

Management's Responsibility for Financial Reporting

The management of Inter Pipeline Ltd. ("Inter Pipeline") is responsible for the presentation and preparation of the accompanying consolidated financial statements of Inter Pipeline.

The consolidated financial statements have been prepared by Inter Pipeline in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board and Canadian generally accepted accounting principles as contained within Part 1 of the Institute of Chartered Accountants Handbook and, where necessary, include amounts based on the best estimates and judgments of the management of Inter Pipeline.

The management of Inter Pipeline recognizes the importance of Inter Pipeline maintaining the highest possible standards in the preparation and dissemination of statements presenting its financial condition. If alternative accounting methods exist, management has chosen those policies it deems the most appropriate in the circumstances. In discharging its responsibilities for the integrity and reliability of the financial statements, management has developed and maintains a system of accounting and reporting supported by internal controls designed to ensure that transactions are properly authorized and recorded, assets are safeguarded against unauthorized use or disposition, and liabilities are recognized.

Ernst & Young LLP, an independent firm of chartered accountants, was appointed to audit Inter Pipeline's financial statements and provide an independent audit opinion. To provide their opinion on the accompanying consolidated financial statements, Ernst & Young LLP review Inter Pipeline's system of internal controls and conduct their work to the extent they consider appropriate.

The Audit Committee, comprised entirely of independent directors, is appointed by the Board of Directors of Inter Pipeline. The Audit Committee meets quarterly to review Inter Pipeline's interim consolidated financial statements and Management's Discussion and Analysis and recommends their approval to the Board of Directors. As well, the Audit Committee meets annually to review Inter Pipeline's annual consolidated financial statements and Management's Discussion and Analysis and recommends their approval to the Board of Directors. The Board of Directors approves Inter Pipeline's interim and annual consolidated financial statements and the accompanying Management's Discussion and Analysis.

INDEPENDENT AUDITORS' REPORT

To the Shareholders of **Inter Pipeline Ltd.**

We have audited the accompanying consolidated financial statements of Inter Pipeline Ltd., which comprise the consolidated balance sheets as at December 31, 2013 and 2012, and January 1, 2012, and the consolidated statements of changes in equity, net (loss) income, comprehensive income and cash flows for the years ended December 31, 2013 and 2012, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

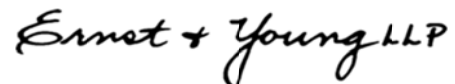

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Inter Pipeline Ltd. as at December 31, 2013 and 2012, and January 1, 2012, and its financial performance and its cash flows for the years ended December 31, 2013 and 2012, in accordance with International Financial Reporting Standards.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

1. STRUCTURE OF THE CORPORATION

Inter Pipeline Ltd. (Inter Pipeline or the Corporation) was incorporated under the provisions of the Business Corporations Act (Alberta) on January 29, 2013. On May 31, 2013, the Corporation changed its name to Inter Pipeline Ltd. from 1726761 Alberta Ltd. On September 1, 2013, the Corporation carried on the business of Inter Pipeline Fund (the Fund) following the conversion from a limited partnership to a dividend paying corporation (Corporate Conversion) pursuant to a plan of arrangement under the Business Corporations Act (Alberta) (the Arrangement).

The Fund was formed as a limited partnership under the laws of Alberta pursuant to a Limited Partnership Agreement (LPA) dated October 9, 1997. Pursuant to the LPA, Pipeline Management Inc. (General Partner) was required to maintain a minimum 0.1% interest in the Fund. The Fund was dependent on the General Partner for administration and management of all matters relating to the operation of the Fund. As a result, the General Partner was entitled to recover all direct and indirect expenses, including general and administrative expenses incurred on behalf of the Fund. The General Partner also received an annual base management fee equal to 2% of the Fund's annual "Operating Cash" as defined in the LPA. In addition, the General Partner was entitled to earn an annual incentive fee, which was calculated based on a range of percentages of annual distributable cash, as defined in the LPA; an acquisition fee of 1.0% of the purchase price of any assets acquired by the Fund (excluding pipeline assets originally acquired); and a disposition fee of 0.5% of the sale price of any assets sold by the Fund.

Prior to Corporate Conversion the General Partner held a 0.1% partnership interest in the Fund represented by Class B units. Public investors held the remaining 99.9% partnership interest as limited partners represented by Class A units. Until June 1, 2013, the General Partner's 0.1% partnership interest was controlled by Pipeline Assets Corp. (PAC) and the General Partner was a wholly owned subsidiary of PAC, a corporation controlled solely by the Chairman of the Board of the General Partner. Following completion of the Internalization Transactions, the General Partner's 0.1% partnership interest was controlled by the independent directors of the General Partner.

Corporate Conversion was approved by the Fund's Class A unitholders at a special meeting of unitholders on August 22, 2013. The Arrangement was granted final approval by the Court of Queen's Bench of Alberta and all requisite regulatory approvals and material third party consents and approvals were received. As a result, Corporate Conversion was effective September 1, 2013. Upon completion of the Arrangement, the Fund's Class A unitholders received one common share of Inter Pipeline in exchange for each Class A unit of the Fund held. The Fund was dissolved and the consolidated financial statements of Inter Pipeline reflect the assets and liabilities of the Fund at the respective carrying amounts and comparative information of the Fund as previously reported. In these and future financial statements, Inter Pipeline will refer to common shares, shareholders, restricted share units and dividends, which were formerly referred to as partnership units, unitholders, deferred unit rights and distributions under the partnership structure. Comparative figures in these and future financial statements will reflect the history of the Fund to the date of Corporate Conversion (refer to note 5 for more details on Corporate Conversion).

Inter Pipeline is comprised of four industry operating segments located in two geographic segments: oil sands transportation business, conventional oil pipelines business and natural gas liquids (NGL) extraction business all operating in Canada, while the bulk liquid storage business operates in Europe. The head office, principal address and records office of Inter Pipeline are located at 2600, 237 – 4th Avenue SW, Calgary, Alberta, Canada.

These audited consolidated financial statements were authorized for issue in accordance with a resolution of the Board of Directors of Inter Pipeline on February 20, 2014.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

2. STATEMENT OF COMPLIANCE AND BASIS OF PREPARATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). The accounting policies that follow have been consistently applied to all years presented.

Note 27 discloses the impact of the accounting policies adopted in 2013 on Inter Pipeline's previously reported balance sheets, statements of net income, comprehensive income and cash flows. Comparative figures for 2012 in these financial statements have been restated to give effect to these changes.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Measurement Basis

The financial statements are prepared on a going concern basis, under the historical cost convention except for derivative financial assets and liabilities and long-term payable/long-term receivable that have been measured at fair value through profit or loss (FVTPL) and long-term incentive plan (LTIP) awards that have been measured at fair value.

The preparation of financial statements in accordance with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise judgment in applying Inter Pipeline's significant accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 3d.

b) Basis of Consolidation

These audited consolidated financial statements include the accounts of Inter Pipeline, its subsidiary companies, partnerships and any joint arrangements. The financial statements of the subsidiary companies, partnerships and joint arrangements are prepared for the same reporting period as Inter Pipeline, using consistent accounting policies.

Business Combinations

Business acquisitions are accounted for using the acquisition method of accounting at the date control of a business is obtained. The cost of an acquisition is measured as the aggregate of the fair values of the assets given or equity instruments issued, net of liabilities incurred or assumed, and is allocated to the fair value of the acquiree's identifiable net assets acquired, including intangible assets. Goodwill is recognized when the cost of the acquisition exceeds the fair value of the identifiable net assets acquired. Costs directly associated with the acquisition are expensed.

Subsidiaries

Subsidiaries are fully consolidated from the date of acquisition, being the date on which Inter Pipeline obtained control, and continue to be consolidated until the date that such control ceases. Intercompany balances, transactions, and unrealized gains and losses from intercompany transactions, are eliminated on consolidation. Ownership interests in subsidiaries represented by other parties that do not control the entity are presented in the consolidated statements as balances and activities attributable to non-controlling interest.

Non-controlling Interest

Inter Pipeline has an indirect 85% ownership interest in the Cold Lake Pipeline Limited Partnership (Cold Lake LP) and an 85% ownership interest in its general partner Cold Lake Pipeline Ltd. (collectively Cold Lake). Non-controlling interest represents a 15% ownership interest in Cold Lake attributable to an unrelated third party. The portion of equity in entities not owned by Inter Pipeline is reflected as non-controlling interest within total equity on the consolidated balance sheet.

Interest in Joint Operation

Inter Pipeline has a 50% interest in the Empress V NGL extraction facility which is accounted for as a joint operation. Empress V is not a separate legal entity and all strategic financial and operating decisions

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

must be jointly agreed by all parties to the joint arrangement. All parties have direct exclusive rights to their joint interest share of the Empress V assets and the economic benefit generated from them. Accordingly, the results of Empress V are consolidated in a manner that reflects Inter Pipeline's 50% interest in the individual income, expenses, assets, liabilities and cash flows of Empress V on a line by line basis in the consolidated results.

c) Accounting Policies Adopted in 2013

Inter Pipeline has adopted the following new and revised standards, along with any consequential amendments, effective January 1, 2013. These changes were made in accordance with the applicable transitional provisions.

IFRS 10 Consolidated Financial Statements (IFRS 10)

IFRS 10 replaces IAS 27 *Consolidated and Separate Financial Statements* (IAS 27) and Standing Interpretations Committee (SIC) 12 *Consolidation-Special Purpose Entities*. IFRS 10 requires consolidation of an investee only if the investor possesses power over the investee, has exposure to variable returns from its involvement with the investee and has the ability to use its power over the investee to affect its returns. Detailed guidance is provided on applying the definition of control. The accounting requirements for consolidation have remained largely consistent with IAS 27. Management has evaluated Inter Pipeline's investment in Cold Lake and determined that Inter Pipeline controls the relevant activities of this investment in accordance with IFRS 10 (see note 3d). As a result, Inter Pipeline consolidates 100% of Cold Lake under IFRS 10, compared to proportionate consolidation of 85% of Cold Lake under IAS 31 *Interests in Joint Ventures* (IAS 31). A non-controlling interest is recorded to represent the 15% equity investment in Cold Lake that is not attributable to Inter Pipeline (refer to note 27 for a reconciliation of the changes).

IFRS 11 Joint Arrangements (IFRS 11)

IFRS 11 supersedes IAS 31 and SIC 13 *Jointly Controlled Entities – Non-Monetary Contributions to Venturers* and is applied to interests in joint arrangements where there is joint control. IFRS 11 requires joint arrangements to be classified as either joint operations or joint ventures. The structure of the joint arrangement is no longer the most significant factor when classifying the joint arrangement as either a joint operation or a joint venture. For joint operations, an entity recognizes its share of assets, liabilities, revenues and expenses of the joint operation. An investment in a joint venture is accounted for using the equity method as set out in *IAS 28 Investments in Associates and Joint Ventures (amended in 2011)*. The adoption of IFRS 11 did not result in any changes to the accounting for Inter Pipeline's only jointly controlled operation, its 50% investment in the Empress V NGL Extraction facility, which is accounted for as a joint operation.

IFRS 12 Disclosure of Interests in Other Entities (IFRS 12)

IFRS 12 provides disclosure requirements for a reporting entity's interests held in other entities including: subsidiaries, joint arrangements, associates, or unconsolidated structured entities. Inter Pipeline has adopted IFRS 12 in its financial statement disclosure effective January 1, 2013, and for the comparative periods.

IFRS 13 Fair Value Measurement (IFRS 13)

IFRS 13 defines fair value and provides, in a single IFRS, a framework for measuring fair value when it is required or permitted within IFRS standards. The standard also provides consistent disclosure requirements about fair value measurements. The adoption of IFRS 13 did not require any adjustments to the valuation techniques used by Inter Pipeline to measure fair value and did not result in any measurement adjustments as at January 1, 2013.

IAS 19 Employee Benefits (Revised) (IAS 19)

IAS 19 amends certain accounting requirements for defined benefit pension plans. The amendments included fundamental changes such as removing the corridor mechanism and the concept of expected returns on plan assets. Effective January 1, 2013, the actual return on Inter Pipeline's pension plan

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

assets is calculated using the same interest rate as applied for the purpose of discounting the benefit obligation. The impact of the amended standard on Inter Pipeline's results was insignificant to prior periods and resulted in increased financing charges of approximately \$0.3 million for the year ended December 31, 2013.

IAS 1 Presentation of Financial Statements, Amendment (IAS 1)

Inter Pipeline has adopted the amendments to IAS 1 effective January 1, 2013. These amendments required Inter Pipeline to group other comprehensive income items by those that will be reclassified subsequently to profit or loss and those that will not be reclassified. These presentation changes did not result in any adjustments to other comprehensive income or comprehensive income.

d) Critical Accounting Estimates and Judgments

The preparation of the annual consolidated financial statements in accordance with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Estimates and underlying assumptions are reviewed on an ongoing basis and are based on management's experience and other factors, including expectations about future events that are believed to be reasonable under the circumstances. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

The amounts recorded for derivative financial instruments; long-term payable/long-term receivable; business combinations; consolidation of non-controlling interest; non-financial asset impairment; depreciation and amortization; provisions; and deferred income taxes are based on estimates and judgments. By their nature, these estimates and judgments are subject to measurement uncertainty and the effect on the financial statements of changes in such estimates and judgments in future years could be material. The following discusses the most significant accounting judgments and estimates that Inter Pipeline has made in the preparation of these consolidated financial statements.

Derivative Financial Instruments and Long-Term Payable/Long-Term Receivable

Inter Pipeline utilizes derivative financial instruments to manage its exposure to market risk relating to commodity prices, foreign exchange and interest rates. All derivative financial instruments and the long-term payable/long-term receivable are measured at fair value.

The fair values of derivative financial instruments and the long-term payable/long-term receivable are based on an approximation of the amounts that would have been paid to or received from counterparties to settle the instruments outstanding. The fair values of derivative financial instruments and the long-term payable/long-term receivable are calculated by Inter Pipeline using a discounted cash flow methodology with reference to actively quoted forward prices and/or published price quotations in an observable market and market valuations provided by counterparties. Forward prices for NGL swaps are less transparent because they are less actively traded. These forward prices are assessed based on available market information for the time frame for which there are derivative financial instruments in place. These fair values are discounted using a risk-free rate plus a credit premium that takes into account the credit quality of the instrument. By their nature, these estimates are subject to measurement uncertainty and the effect on the financial statements of changes in these estimates could be material. These estimates may not necessarily be indicative of the amounts that could be realized or settled in a current market transaction and differences could be significant. A significant change in commodity prices, foreign exchange rates or interest rate assumptions underlying mark-to-market valuations of derivative financial instruments and the long-term payable/long-term receivable would change the fair value reported in the consolidated balance sheets and unrealized change in fair value of derivative financial instruments in the consolidated statements of net income.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

Business Combinations

The consideration transferred of an acquired business is allocated to the identifiable assets acquired and liabilities assumed at their estimated fair values on the acquisition date. The excess of the consideration transferred over the amount allocated to net assets is recorded as goodwill. All available information is used to estimate fair values. External consultants are typically engaged to assist in the fair value determination of identifiable intangible assets and other significant assets or liabilities. The preliminary allocation of consideration transferred may be adjusted, as necessary, up to one year after the acquisition closing date due to additional information impacting asset valuation and liabilities assumed.

The allocation process of the consideration transferred involves uncertainty as management is required to make assumptions and apply judgment to estimates of the fair value of the acquired assets and liabilities, including highest and best use of assets. Quoted market prices and widely accepted valuation techniques, including discounted cash flows and market multiple analyses are used to estimate the fair market value of the assets and liabilities and depreciated replacement costs is used for the valuation of tangible assets. These estimates include assumptions on inputs within the discounted cash flow calculations related to forecasted revenues, cash flows, contract renewals, asset lives, industry economic factors and business strategies.

Consolidation of Non-controlling Interest

On January 2, 2003 Inter Pipeline acquired an additional 70% interest in Cold Lake which, combined with its initial 15% investment acquired on October 5, 2000, resulted in Inter Pipeline owning an 85% interest in Cold Lake. The remaining 15% is owned by an unrelated third party.

Cold Lake's Unanimous Shareholder Agreement (USA) establishes the decision-making abilities of Cold Lake's shareholders in relation to the Cold Lake pipeline system. Cold Lake is administered by a management committee, with each owner represented by two voting members. The USA splits decisions into two categories: those that require minimum approval and those that require special majority approval. Decisions that are subject to minimum approval require an affirmative vote by members of the management committee representing at least 50% of the shareholders. Therefore, Inter Pipeline is the only owner that has the ability to approve items requiring minimum approval unilaterally. Decisions that are subject to special majority approval require the affirmative vote of at least two members representing 75% or more of the shareholders. Therefore, neither Cold Lake owner can unilaterally approve items requiring special majority approval.

As outlined in the USA, the following items require minimum approval:

- Decision to proceed with a feasibility study for a non-Transportation Service Agreement (TSA) expansion;
- Decision to proceed with non-TSA expansions where a feasibility study has been undertaken and no adverse economic impact is identified; and
- TSA expansions required by founding shippers pursuant to the existing TSA.

As outlined in the USA, the following items require special majority approval:

- Decision to proceed with laterals and extensions;
- Entering into new agreements which create obligations for Cold Lake in excess of a minimum dollar threshold;
- Decision to proceed with a proposed non-TSA expansion where no feasibility study has been undertaken;
- The timing, nature and amount of any debt financing to be undertaken; and
- Approval of Cold Lake's annual operating and capital budgets.

Upon initial adoption of IFRS in 2011, and specifically IAS 27 and IAS 31, Inter Pipeline determined that it had joint, rather than sole, control of Cold Lake. Under IAS 27, control was defined as "the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities". IAS 31 indicated that joint control existed when strategic financial and operating decisions relating to the activity

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

required the unanimous consent of the parties sharing control. Inter Pipeline and the third party owner had joint control given that both owners shared control over financing decisions that required majority approval pursuant to the USA. As a result, Inter Pipeline's interest in Cold Lake was treated as a joint venture under IAS 31, and its 85% interest was proportionately consolidated.

In 2013, Inter Pipeline adopted IFRS 10, which revised the definition of control from IAS 27. Under IFRS 10, a single control model was established that focused on relevant activities, which are defined as "activities of an investee that significantly affect the investee's returns" (Relevant Activities), and specifically an investor's power to direct those activities, exposure to variable returns and the ability to use power to affect the amount of an investor's returns. Compared with the requirements of IAS 27, IFRS 10 requires management to exercise significant judgment in its assessment of control including, but not limited to, the determination of the investee's Relevant Activities, the investor's ability to direct those Relevant Activities, the investor's exposure to returns of the investee, as well as rights of other parties. IFRS 10 also requires management to continuously assess control over an investee.

In accordance with IFRS 10, Inter Pipeline determined that it had control over Cold Lake upon the acquisition of the additional 70% interest in 2003. Inter Pipeline, as 85% owner of the Cold Lake pipeline system, has the ability to unilaterally approve all Relevant Activities, which require minimal approval pursuant to the USA. The most significant Relevant Activities include the identification of expansion and other transportation service opportunities, performance of due diligence, undertaking economic feasibility studies and managing decisions to undergo non-TSA capital projects, where a feasibility study has been undertaken. Management believes the ability to exclusively decide to proceed with such capital projects, including the major capital program to construct a bitumen blend pipeline and associated facilities in support of the Foster Creek project, will significantly affect Cold Lake's returns, which is a key determination of control under IFRS 10. Such project returns are commercially negotiated by Inter Pipeline separately from the fixed returns contained within the TSA.

Capital projects to construct laterals and extensions are not considered to be Relevant Activities as the returns from those projects are fixed based on provisions within the existing TSA. In addition, financing activities are not considered to be significant Relevant Activities given that Cold Lake does not have any external debt, nor does Cold Lake have any intentions at this time to obtain debt financing in the future.

As a result of the foregoing, Inter Pipeline has the ability to unilaterally impact Cold Lake's returns by proceeding with significant capital projects, on a negotiated basis, without the approval or consent of the other third party owner. Projects that require special majority approval are based on returns prescribed within the TSA and have limited applicability to the determination of control under IFRS 10. Based on these considerations, Inter Pipeline has control over Cold Lake.

Impairment of Non-financial Assets

For the purposes of Inter Pipeline's impairment testing, fair value is estimated using a discounted cash flow methodology. This method estimates fair value less costs of disposal using a discounted ten year forecasted cash flow with a terminal value, based on Inter Pipeline's assessment of the long-term outlook for each business. Cash flows are estimated from several sources including internal budgets and long-term contractual transportation agreements with shippers. Observable market data is used to develop discount rates for each business, which approximate the discount rate from a market participant's perspective. The fair value measurement is classified within level 3 of the fair value hierarchy (note 3q).

The determination of the magnitude of impairment involves the use of estimates, assumptions and judgments on highly uncertain matters particularly with respect to determining fair value less costs of disposal. Such estimates, assumptions and judgments include, but are not limited to, the choice of discount rates that reflect appropriate asset-specific risks, timing of revenue and customer turnover, inflation factors for projected operating and maintenance capital expenditures and commodity prices.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

Impairment indicators include a significant decline in an asset's market value, significant adverse changes in the technological, market, economic or legal environment in which the assets are operated, evidence of obsolescence or physical damage of an asset, significant changes in the planned use of an asset, or ongoing under-performance of an asset. Application of these factors to the facts and circumstances of a particular asset requires a significant amount of judgment.

For the purposes of Inter Pipeline's goodwill impairment testing, the recoverable value of a cash generating unit (CGU) calculated in a preceding year may be used in the current year if certain conditions are met. These conditions include: that the assets and liabilities of the CGU to which goodwill has been allocated have not changed significantly since the recoverable value was previously calculated; the most recent recoverable value calculation exceeded the CGU's carrying amount by a substantial margin; and based on an analysis of events that have occurred and circumstances that have changed since the most recent recoverable value was calculated, the likelihood that a current recoverable value calculation would be less than the current carrying amount of the CGU is remote.

Depreciation and Amortization

Calculation of the net book value of property, plant and equipment and intangible assets requires Inter Pipeline to make estimates of the useful life of the assets, residual value at the end of the asset's useful life, method of depreciation and amortization and whether impairment in value has occurred. Residual values of the assets, estimated useful lives and depreciation and amortization methodology are reviewed annually with prospective application of any changes, if deemed appropriate. Changes to estimates and specifically those related to pipeline assets, which could be significant, could be caused by a variety of factors, including changes to the physical life of the assets as well as the estimated remaining life of crude oil reserves expected to be gathered and shipped on these pipeline systems. A change in any of the estimates would result in a change in the amount of depreciation and, as a result, a charge to net income recorded in the period in which the change occurs, with a similar change in the carrying value of the asset on the consolidated balance sheets.

Provisions

Inter Pipeline is required to apply a number of assumptions in estimating provisions recorded for decommissioning and environmental remediation associated with Inter Pipeline's sites. Liabilities are calculated based on current price estimates using current technologies in accordance with current legal or constructive requirements. Liabilities are adjusted for inflation to reflect the timing of when the decommissioning or remediation activity is anticipated. Where a range of estimates exists, the possible outcomes are weighted to determine a probable settlement value or the midpoint is used where all outcomes are equally likely. Inter Pipeline's decommissioning obligations are expected to occur when the assets are no longer economically viable. The economic lives of these assets are estimated based on future expectations involving the supply of petroleum, chemical and other products and demand for certain services and therefore the timing of decommissioning may change significantly in the future. Actual costs and cash outflows may differ from these estimates due to changes in laws or regulations, timing of projects, costs and technology. As a result, there could be material adjustments to the provisions established. If the effect of the time value of money is material, provisions are discounted to their present value using a pre-tax risk-free rate.

Conventional Oil Pipelines Business and Oil Sands Transportation Business

Property, plant and equipment related to the conventional oil pipelines and oil sands transportation businesses consist primarily of underground pipelines and above ground equipment and facilities. The potential cost of future decommissioning activities is a function of several factors, including regulatory requirements at the time of pipeline abandonment, the size of the pipeline and the pipeline's location. Decommissioning requirements can vary considerably, ranging from purging product from the pipeline, refilling with inert gas and capping all open ends to removal of the pipeline and reclamation of the right-of-way. Under current regulations, the estimated cost for the decommissioning obligation include: purging product from the pipeline, refilling with inert gas and capping all open ends and removal of surface facilities and reclamation of the surface facility sites.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

NGL Extraction Business and Bulk Liquid Storage Business

NGL extraction and the bulk liquid storage businesses consist mainly of three NGL extraction facilities and twelve bulk liquid storage facilities, respectively. Inter Pipeline's decommissioning obligation represents the present value of the expected cost to be incurred upon the termination of operations and closure of the NGL extraction facilities and leased bulk liquid storage sites. The estimated costs for decommissioning obligations include such activities as dismantling, demolition and disposal of the facilities and equipment, as well as remediation and restoration of the facility sites.

Deferred Income Taxes

Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and carried forward tax losses can be utilized. Assessing the recoverability of deferred taxes requires management to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecasted funds from operations and the application of existing tax laws.

The carrying amount of deferred tax assets is reviewed each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred income taxes contain uncertainties because of the assumptions made about when deferred tax assets are likely to reverse, and a judgment as to whether or not there will be sufficient taxable profits available to offset the tax assets when they do reverse. This requires assumptions regarding future profitability and is therefore inherently uncertain.

e) Segment Reporting

Inter Pipeline determines its reportable segments based on the nature of its operations and geographic location, which is consistent with how the business is managed and results reported to the chief operating decision maker. Each operating segment also uses a measure of profit and loss that represents income before income taxes. Operating segment assets and liabilities are measured on the same basis as consolidated assets and liabilities.

Industry Segments

The oil sands transportation business consists of three pipeline systems that transport petroleum products and diluent and provide related blending and handling services in northern Alberta. The Corridor, Cold Lake and Polaris pipeline systems operate under long-term contracts with a limited number of customers. The conventional oil pipelines business primarily involves the transportation, storage and processing of hydrocarbons, as well as midstream marketing blending and handling services. The NGL extraction business consists of processing natural gas to extract NGLs including ethane and a mixture of propane, butane and pentanes plus (collectively known as propane-plus). The bulk liquid storage business involves the primary storage and handling of bulk liquid products through the operation of eight bulk liquid storage terminals located in the United Kingdom (UK), Germany, and Ireland, referred to collectively as Simon Storage, and four bulk liquid storage terminals located in Denmark, referred to collectively as Inter Terminals.

Geographic Segments

Inter Pipeline has two geographic segments, Canada and Europe. The bulk liquid storage business is located in Europe, while all other operating segments are located in Canada.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

f) Revenue Recognition

Oil Sands Transportation Business

Capital fee revenue on the Cold Lake pipeline system is determined by the nature of the contract and is recognized based on either a fixed fee or volumes transported and services provided to each shipper. In addition, an operating fee equivalent to substantially all of the Cold Lake L.P.'s operating costs is recovered from the Cold Lake shippers.

Revenue on the Corridor pipeline system is recognized as services are provided in accordance with terms prescribed by the Firm Service Agreement (FSA) with the shippers. Under the terms of the FSA, revenues are determined by an agreed upon annual revenue requirement formula which allows for the recovery of prescribed expenditures and costs associated with the operation of the Corridor pipeline system, including debt financing costs, operating costs, Rate Base (as defined in the FSA) depreciation and taxes, as well as a rate of return on the equity component of the Rate Base determined with reference to a spread over a long-term bond yield reported by the Bank of Canada.

The Polaris pipeline system recognizes capital fee revenue determined by the nature of the contract and is based on either a fixed fee or volumes transported and services provided to each shipper, with an adjustment, if necessary, to reflect each shipper's minimum "ship-or-pay" revenue commitment. In addition, an operating fee equivalent to all of the pipeline's operating costs is recovered from the Polaris pipeline system's shippers.

Conventional Oil Pipelines Business

Revenues associated with the transportation, storage and processing of hydrocarbons on the conventional oil pipelines gathering systems, namely trunk line tariffs and gathering tariffs are recognized as the services are provided. The majority of volumes are transported on the conventional oil pipelines gathering systems under short-term contracts with a fixed tolling arrangement and no volume commitment made by the shipper.

Volumes purchased by Inter Pipeline to be used in the blending process that are then resold at a pre-arranged differential are recognized on a net basis. Sales of additional volumes created through the blending process are recognized on a gross basis with corresponding product purchases of blend components. Revenue is recognized when title is transferred.

NGL Extraction Business

Revenue for the NGL extraction facilities is recognized when the earnings process is complete. This is as the service is provided or when products are shipped to the customer in accordance with the terms of the sales contract, title or risk of loss has been transferred and pricing is either fixed or determinable. Revenue recognition is based on three methodologies: according to the terms of the profit share agreements which include an annualized adjustment; fee based revenue which is recognized when volumes are produced; and cost of service revenue, which is predominantly based on a fixed monthly fee.

Bulk Liquid Storage Business

Revenues are derived from the storage and handling of bulk liquid products and provision of complementary services and are recognized as the services are provided. Revenue is measured at the fair value of the consideration received, excluding discounts, rebates and sales taxes or duties. Revenue received in advance is recognized over the duration of the contract to which it applies.

Deferred Revenue

Deferred revenue represents cash received in excess of revenues recognized.

g) Cash and Cash Equivalents

Cash and cash equivalents consist of bank accounts and overnight deposits with original maturities of three months or less.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

h) Long-Term Payable and Long-Term Receivable

Inter Pipeline (Corridor) Inc. (Corridor) utilizes an interest rate derivative to manage a portion of its interest rate risk. Gains or losses arising on the interest rate swap contract are payable to, or recoverable from, the Corridor shippers, respectively; therefore the long-term portion of the unrealized gain or loss has been recorded as a long-term liability or asset. The current portion is included in accounts payable and accrued liabilities or accounts receivable. Inter Pipeline has chosen to designate the long-term payable/receivable due to/from the Corridor shippers as FVTPL as it represents unrealized gains or losses on interest rate swaps that are classified as FVTPL (note 3q).

i) Property, Plant and Equipment

The calculation of depreciation for property, plant and equipment includes assumptions related to useful lives and residual values. The assumptions are based on management's experience with similar assets and corporate policies.

Oil Sands Transportation Business

Property, plant and equipment in the oil sands transportation business consist of pipelines and related facilities. Depreciation of capital costs is calculated on a straight-line basis over the estimated service life of the assets, which is 80 years. The cost of pipelines and facilities includes all expenditures directly attributable to bringing the pipeline to the location and condition necessary for its intended use, including costs incurred for system construction, expansion and betterments until the assets are available for use. Pipeline system costs also include an allocation of directly attributable overhead costs and capitalized borrowing costs. Capitalization of borrowing costs ceases when the related property, plant and equipment is substantially complete and ready for its intended productive use.

Pipeline line fill and tank working inventory for the Cold Lake and Corridor pipeline systems represent petroleum based product purchased for the purpose of charging the pipeline system and partially filling the petroleum product storage tanks with an appropriate volume of petroleum products to enable commercial operation of the facilities and pipeline. Pipeline line fill for the Polaris pipeline system is owned by the shippers directly. The cost of line fill includes all direct expenditures for acquiring the petroleum based products. These product volumes will be recovered upon the ultimate retirement and decommissioning of the pipeline system under the terms of the agreement. Cold Lake line fill is carried at cost and Corridor line fill is carried at cost less accumulated depreciation. Proceeds from the sale of Cold Lake line fill will be fully available to Inter Pipeline, whereas proceeds from the sale of Corridor's line fill will be used to fund the cost of any decommissioning obligations and to the extent Corridor's decommissioning obligations exceed the value of the line fill, Inter Pipeline will be obligated to fund the excess. To the extent the value of the line fill exceeds the decommissioning obligation; the excess funds will be refunded to the Corridor shippers. Depreciation of Corridor line fill is calculated on the same basis as the related property, plant and equipment.

Conventional Oil Pipelines Business

Expenditures on conventional oil pipelines system expansions and betterments are capitalized. Maintenance, pipeline integrity verification and repair costs are expensed as incurred. Depreciation of pipeline facilities and equipment commences when the pipelines are available for use. Depreciation of the capital costs is calculated on a straight-line basis over the estimated 80 year service life of the Bow River pipeline system assets and 30 year service life of the Central Alberta and Mid-Saskatchewan pipeline system assets. These estimates are connected to the estimated remaining life of the crude oil reserves expected to be gathered and shipped on these pipeline systems. Pipeline line fill and tank working inventory for the conventional oil pipelines system represents petroleum based product purchased for the purpose of charging the pipeline system and partially filling the petroleum product storage tanks with an appropriate volume of petroleum products to enable commercial operation of the facilities and pipeline. The cost of line fill includes all direct expenditures for acquiring the petroleum based products. These product volumes will be recovered upon the ultimate retirement and decommissioning of the pipeline system and are carried at cost.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

NGL Extraction Facilities and Equipment

Property, plant and equipment of the NGL extraction business are comprised primarily of three extraction facilities and associated equipment. Expenditures on facility expansions, major repairs and maintenance, or betterments are capitalized, while routine maintenance and repair costs are expensed as incurred. Depreciation of the extraction facilities and additions thereto is charged once the assets are ready for their intended use, and is calculated on a straight-line basis over the 30 year estimated useful life of the assets.

Storage Facilities and Equipment

The bulk liquid storage business' property, plant and equipment consist of storage facilities and associated equipment. Expenditures on expansion and betterments are capitalized, while maintenance and repair costs are expensed as incurred. Depreciation of the property, plant and equipment is calculated on a straight-line basis over the estimated service life of the assets, the majority of which ranges from four to 75 years.

j) Goodwill and Intangible Assets

Goodwill

Inter Pipeline has goodwill in four of its CGU's: the Corridor and Polaris pipeline systems in the oil sands transportation business and Simon Storage and Inter Terminals in the bulk liquid storage business. Assets are grouped in CGU's which are the lowest levels for which there are separately identifiable cash inflows. Goodwill represents the excess of the consideration transferred over the fair value of the net identifiable assets of the Corridor, Polaris, Simon Storage and Inter Terminals CGU's. After initial recognition, goodwill is carried at cost less any write downs for impairment. During each fiscal year and as economic events dictate, management conducts an impairment test taking into consideration any events or circumstances which might have impaired the recoverable amount. If the carrying amount of the individual CGU exceeds its recoverable amount, an impairment loss is recognized to the extent that the carrying amount of the goodwill exceeds its recoverable amount, determined on a fair value less costs of disposal discounted cash flow basis.

Where goodwill forms part of a CGU and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the CGU retained.

Intangible Assets

Inter Pipeline's intangible assets are amortized using an amortization method and term based on estimates of the useful lives of these assets.

Cold Lake Transportation Services Agreement

The Cold Lake TSA intangible asset is the estimated value, using a discounted cash flow analysis, of the shipping agreement entered into with the Cold Lake founding shippers on the Cold Lake pipeline system as valued on January 2, 2003. Although the ship-or-pay portion of the TSA expired on December 31, 2011, the term of the TSA extends until the Cold Lake LP gives notice that it forecasts it will earn less than \$1.0 million of capital fees in the year. The Cold Lake founding shippers may contract with a third party to transport their dedicated petroleum after giving the Cold Lake LP notice of at least 20 months prior to the effective date and meeting certain conditions. The Cold Lake LP has the right to match any new service offer from a third party. This intangible asset is being amortized on a straight-line basis over 30 years. The remaining amortization period of the TSA is approximately 19 years.

Customer Contracts, Relationships and Tradename

The NGL extraction business' intangible assets consist of customer contracts for the sales of ethane and propane-plus. Contracts include fee-based contracts, cost-of-service contracts and commodity-based arrangements. The value of these contracts, calculated assuming anticipated renewals, is estimated to be realized over an average period of 30 years since the date of acquisition of July 28, 2004, which is the

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

period over which amortization is being charged using the straight-line method. Should the useful life or the likelihood of the renewal of the customer contracts change, the amortization of the remaining balance would change accordingly. The average remaining amortization period of the customer contracts is approximately 21 years.

Within the bulk liquid storage business segment, Simon Storage's intangible assets consist of a customer contract for the storage and handling of bulk liquid products and tradename. These assets are being amortized on a straight-line basis over 30 years. Should the likelihood of the renewal of the customer contract or estimated life of the tradename change, the amortization of the remaining balance would change accordingly. The remaining amortization period of the customer contract and tradename is approximately 22 years. Inter Terminals' intangible assets, also within the bulk liquid storage business segment, consist of customer contracts with agreed guaranteed payments for storage revenue and minimum throughput volumes. These assets are being amortized on a straight-line basis over the remaining life of each contract, the majority of which ranged from eight months to 30 months at the date of acquisition. At December 31, 2013, some of the contracts are fully amortized, while the remaining amortization period of those contracts not yet fully amortized is up to six months.

Patent

A patented operational process utilized in one of the NGL extraction facilities is being amortized on a straight-line basis over 14 years from the acquisition of the NGL extraction business on July 28, 2004. The remaining amortization period of the patent is approximately five years.

k) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset that takes a substantial period of time to get ready for its intended use are capitalized as part of the cost of the related assets, until such time as the assets are substantially ready for their intended productive use. All other borrowing costs are expensed in the period in which they are incurred. Borrowing costs include interest and other costs incurred in connection with the borrowing of funds. Borrowing costs are amortized over the estimated service life of the assets to which the borrowings relate.

l) Provisions

A provision is recognized when it is determined that an obligation has arisen as a result of a past event, the obligation can be reliably estimated and it is probable that an outflow of economic benefits will be required to settle the obligation. Inter Pipeline's provisions represent legal or constructive obligations associated with decommissioning tangible long-lived assets at the end of their useful lives and loss contingencies, including environmental remediation costs arising from claims, assessments, litigation, fines and penalties, and other sources.

On initial recognition of a decommissioning obligation, an amount equal to the estimated present value of the obligation is capitalized as part of the cost of the related long-lived asset and depreciated over the asset's estimated useful life. Any subsequent changes to the decommissioning cost estimate or discount rate will result in a similar adjustment to the cost of the related long-lived asset. The provision will accrete to its full value over time through charges to income, or until Inter Pipeline settles the obligation. Recoveries from third parties which are virtually certain to be realized are recorded separately and are not offset against the related provision.

m) Employee Benefits

Long-term Incentive Plan

Awards are paid in cash under Inter Pipeline's LTIP, therefore a fair value basis of accounting is used whereby changes in the liability are recorded in each period based on the number of awards outstanding and the current market price of Inter Pipeline's shares plus an amount equivalent to cash dividends declared to date. The expense is recognized over the vesting periods of the respective awards. Compensation expense and the long-term incentive liability are adjusted to reflect the use of actual

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

historical forfeiture rates as well as estimated future forfeiture rates. The market-based value of the award approximates the intrinsic value as the awards have no exercise price.

Pension Plans

The cost of pension benefits earned by certain employees in the UK, Ireland and Germany covered by the defined benefit pension plans is actuarially determined using the projected unit credit method. Plan assets are measured at fair value for the purpose of determining the actual return on plan assets. Adjustments for plan amendments are expensed over the vesting period of the employee benefits. Interest on Inter Pipeline's pension plan assets is calculated using the same interest rate as applied for the purpose of discounting the benefit obligation. Actuarial gains and losses arise from changes in assumptions and differences between assumptions and the actual experience of the pension plans. Actuarial gains and losses are recognized in full in the period in which they occur in other comprehensive income (OCI). Past service costs are recognized as an expense on a straight-line basis over the average period until the benefits become vested. If the benefits have already vested, immediately following the introduction of, or changes to, a pension plan, past service costs are recognized immediately.

n) Income Taxes

Current Income Taxes

Certain of Inter Pipeline's subsidiaries are taxable corporations in Canada and Europe.

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to taxation authorities. The tax rates and laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date, in countries where Inter Pipeline and its subsidiaries operate and generate taxable income. The actual amount of income tax expense is final only when the tax return is filed and accepted by relevant tax authorities, which occurs subsequent to the issuance of the annual consolidated financial statements.

Management periodically evaluates positions taken in Inter Pipeline's entity tax returns with respect to situations in which applicable tax regulations are subject to interpretation. Provisions are established if appropriate.

Current income tax relating to items recognized directly in shareholders' equity is recognized in equity and not the statements of net income.

Deferred Income Taxes

Inter Pipeline uses the liability method where deferred income taxes are recognized based on temporary differences between the carrying amounts of assets and liabilities recorded for financial reporting purposes and their tax bases.

Deferred tax assets and liabilities are measured using the tax rates that have been enacted or substantially enacted at the reporting date. The tax rates are those that are expected to apply in the year the asset is to be realized or the liability is to be settled. Future changes in tax laws affecting existing tax rates could limit the ability of Inter Pipeline to obtain tax deductions in future periods.

Deferred tax relating to items recognized outside net income is also recognized outside net income. Deferred tax items are recognized in correlation to the underlying transaction either in comprehensive income or directly in shareholders' equity.

Deferred tax assets and liabilities have been offset if a legally enforceable right exists to offset current income tax assets against current income tax liabilities and the deferred taxes are related to the same taxable entity and the same taxation authority.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

o) Foreign Currency Translation

Foreign Currency Transactions

Items included in the financial statements of each of Inter Pipeline's subsidiaries are measured using the functional currency of that subsidiary being the currency of the primary economic environment in which that subsidiary operates. Transactions that are in a currency other than the functional currency of the subsidiary are translated at exchange rates in effect at the date of the transaction. Monetary assets and liabilities denominated in a foreign currency at the reporting date are retranslated to the functional currency at the exchange rate in effect at the reporting date with the resulting exchange gains or losses recognized in the statements of net income.

Foreign Operations

The results of all of Inter Pipeline's subsidiaries that have a functional currency other than the Canadian dollar are translated into Canadian dollars as follows:

- a. All assets and liabilities, including goodwill and other fair value adjustments arising on business combinations, at foreign exchange rates at the end of the applicable reporting period; and
- b. All income and expenses at monthly average exchange rates over the reporting periods.

The resulting translation gains and losses are included in OCI as foreign currency translation adjustments.

Currently only Inter Pipeline Europe Limited (IPEL) and its respective subsidiaries have functional currencies that differ from the Canadian dollar. Neither IPEL nor any of its subsidiaries operate in hyperinflationary economies. IPEL comprises all of the operations in the bulk liquid storage business.

p) Asset Impairment

Non-Financial Assets

Property, plant and equipment and intangible assets with definite lives are tested for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. Goodwill is tested at least annually for impairment regardless of whether indicators of impairment exist.

For the purpose of measuring recoverable amounts, assets are grouped in CGU's, which are the lowest levels for which there are separately identifiable cash inflows. The recoverable amount is the higher of a CGU's fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, the best evidence of fair value is the value obtained from recent market transactions or the value stated in a binding sale agreement. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples or other available fair value indicators. Inter Pipeline calculates the fair value less costs of disposal using a projected cash flow model applying a fair value less costs of disposal discounted cash flow methodology. After-tax cash flows are discounted using a weighted average cost of capital discount rate that reflects the relative risk of the asset. Projected future cash flows used in the goodwill impairment assessment represent management's best estimate of the future operating performance of these businesses at the current time. A significant change in these assumptions or unanticipated future events could require a provision for impairment in the future which would be recorded as a reduction of the carrying value of goodwill with a charge against net income.

An impairment test is performed by comparing a CGU's carrying amount to its recoverable amount. An impairment loss is recognized to the extent a CGU's carrying amount exceeds its recoverable amount.

Goodwill acquired through a business combination is allocated to each CGU, or group of CGUs, that are expected to benefit from the business combination. A group of CGU's represents the lowest level within

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

the entity at which goodwill is monitored for internal management purposes, which may not be higher than an operating segment.

An impairment loss is recognized in the period it occurs. The impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the CGU and then on a pro-rata basis to reduce the carrying amount of other assets in the CGU with an offset to net income. Impairment losses, other than goodwill impairment, are subsequently evaluated for potential reversal when events or circumstances warrant such consideration.

Financial Assets

Financial assets carried at amortized cost are assessed by Inter Pipeline at each reporting date to determine whether objective evidence of impairment exists. Significant assets are tested for impairment individually then assessed collectively in a group of assets with similar credit risk characteristics. A financial asset is considered to be impaired if one or more events have occurred that would impact the estimated future cash flows of that asset. If evidence of impairment exists, an entity recognizes an impairment loss, the difference between the amortized cost of the financial asset and the present value of the estimated future cash flows, discounted using the instrument's original effective interest rate. The carrying amount of the asset is then reduced by this amount with an offsetting entry to net income. Impairment losses on financial assets carried at amortized cost may be reversed in subsequent periods if the amount of the loss decreases and the decrease can be objectively related to an event occurring after the impairment was recognized.

q) Financial Instruments

Inter Pipeline utilizes derivative financial instruments to manage its exposure to market risks relating to commodity prices, foreign exchange and interest rates. Inter Pipeline has a risk management policy that defines and specifies the controls and responsibilities associated with those activities managing market exposure to changing commodity prices (crude oil, natural gas, NGL's and power) as well as changes within the financial market relating to interest rates and foreign exchange exposure for Inter Pipeline. Inter Pipeline's risk management policy prohibits the use of derivative financial instruments for speculative purposes.

Financial Instruments – Recognition and Measurement

Financial assets and financial liabilities at FVTPL include financial assets and financial liabilities "held-for-trading" or designated as FVTPL on initial recognition. Financial assets or financial liabilities are classified as "held-for-trading" if they are acquired for the purpose of selling in the near term. Financial assets or financial liabilities are designated as FVTPL if Inter Pipeline manages such investments and makes purchases and sales decisions based on their fair value in accordance with Inter Pipeline's documented risk management policy, or if such designation eliminates or significantly reduces a measurement or recognition inconsistency. Financial assets and financial liabilities at FVTPL are measured at fair value with changes in those fair values recognized in net income. Financial assets "available-for-sale" are measured at fair value, with changes in those fair values recognized in OCI. Financial assets "held-to-maturity", "cash, loans and receivables" and "other financial liabilities" are measured at amortized cost using the effective interest method of amortization. Investments in equity instruments classified as "available-for-sale" that do not have a quoted market price in an active market are measured at fair value.

Inter Pipeline has classified its financial instruments as follows: certain components of prepaid expenses and other deposits are classified as "held-for-trading" and measured at carrying value. Cash and cash equivalents and the majority of accounts receivable are classified as "cash, loans and receivables". Cash dividends payable, the majority of accounts payable and accrued liabilities, certain components of deferred revenue, convertible common shares and long-term debt, short-term debt and commercial paper are classified as "other financial liabilities". Derivative financial instruments and the related current and long-term payable/long-term receivable are classified as FVTPL.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

Determination of the fair value of financial assets and liabilities requires the use of valuation techniques that involve many estimates, assumptions and judgments including the timing and magnitude of cash flows, discount rates and reference prices. Estimates of the fair value of derivative contracts outstanding at the end of each financial reporting period are recognized on the consolidated balance sheets and any unrealized changes in these estimates are recognized in the consolidated statements of net income. These amounts are estimates of the fair value at a point in time and the final amount will be determined on the date or interim dates that the derivative contract is settled.

Inter Pipeline capitalizes debt transaction costs, premiums and discounts within long-term debt, short-term debt and commercial paper.

Financial Instruments – Fair Value Hierarchy

Financial instruments recorded at fair value in the consolidated balance sheets are categorized based on the fair value hierarchy of inputs. The three levels of the fair value hierarchy are described as follows:

Level 1 inputs involve limited use of judgments as fair value inputs are based on unadjusted quoted prices in active markets for identical assets and liabilities. Inter Pipeline does not use level 1 inputs for any of its derivative financial instruments and fixed rate debt fair value measurements.

Level 2 inputs require slightly more judgment than level 1 but still involve observable and corroborated, either directly or indirectly, market factors. Inter Pipeline's level 2 inputs include quoted market prices for commodities, foreign exchange, interest rates and credit risk premiums. Financial instruments in this category include non-exchange traded derivatives such as over-the-counter commodity forwards, interest rate swaps, and fixed rate debt. Inter Pipeline obtains information from sources including independent price publications, third party pricing services, market exchanges and investment dealer quotes. Inter Pipeline uses level 2 inputs for all of its derivative financial instruments and fixed rate debt fair value measurements.

Level 3 inputs require the most significant judgments and consist primarily of unobservable or non-market based inputs. Level 3 inputs include longer term transactions, transactions in less active markets or transactions at locations for which pricing information is not available. In these instances, internally developed methodologies are used to determine fair value which primarily includes extrapolation of observable future prices to similar locations, similar instruments or later time periods. Level 3 inputs may include items based on pricing services or broker quotes, but the inputs are not observable and cannot be verified. Inter Pipeline does not use level 3 inputs for any of its derivative financial instruments and fixed rate debt fair value measurements.

r) Financial Guarantees

Financial guarantees are issued contracts that require a payment to be made to reimburse the holder for a loss it incurs because a specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantees are initially recognized as a liability at their fair value and subsequently measured at the higher of the unamortized balance of the related fees received and the amount expected to settle at the balance sheet date.

s) Reserves

Foreign Currency Translation Reserve

The foreign currency translation reserve includes exchange differences arising from the translation of the financial statements of foreign operations.

Defined Benefit Pension Reserve

The defined benefit pension reserve includes actuarial gains and losses on defined benefit pension obligations.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

t) Leases

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at the inception date, whether fulfillment of the arrangement is dependent on the use of a specific asset or the arrangement conveys a right to use an asset. Leases which transfer substantially all the risks and benefits of ownership to Inter Pipeline are classified as finance leases. The leased asset is recognized at the lower of the fair value of the leased property or the present value of the minimum lease payments. Finance lease assets are depreciated over the shorter of the estimated useful life of the asset and the lease term. Other leases are classified as operating leases and payments are amortized on a straight-line basis over the lease term.

4. FUTURE ACCOUNTING PRONOUNCEMENTS

Certain new standards, interpretations and amendments to existing standards were issued by the IASB that are mandatory for accounting periods beginning on or after January 1, 2014 or later periods with early adoption permitted. The standards impacted are as follows:

IFRS 9 Financial Instruments (IFRS 9)

IFRS 9 replaces IAS 39 Financial Instruments: Recognition and Measurement and shall be applied to annual periods beginning on or after January 1, 2015 with early adoption permitted. IFRS 9 establishes principles for the financial reporting of financial assets and financial liabilities that will present relevant and useful information to users of financial statements for their assessment of the amounts, timing and uncertainty of an entity's future cash flows. Inter Pipeline is currently assessing the impact of IFRS 9; however the extent of the impact has not yet been determined.

IFRS Interpretations Committee Interpretation 21 Levies (IFRIC 21)

IFRIC 21 is effective for annual periods beginning on or after January 1, 2014. IFRIC 21 clarifies that an entity recognizes a liability for a levy when the activity that triggers payment, as identified by the relevant legislation, occurs. For a levy that is recognized upon reaching a minimum threshold, IFRIC 21 clarifies that no liability should be anticipated before the specified minimum threshold is reached. Inter Pipeline is currently assessing the impact of IFRIC 21; however the extent of the impact has not yet been determined.

5. CORPORATE RESTRUCTURING

On June 1, 2013, the Fund completed several internal transactions (Internalization Transactions) related to the restructuring of its limited partnership structure to position the business for a planned conversion to corporate form, which eliminated all management, acquisition, divestiture and incentive fees payable to the General Partner. The Fund indirectly purchased its General Partner, for initial consideration of \$170 million, plus adjustments of \$8.6 million, and a second instalment of up to \$170 million, which is partially contingent on the outcome of certain organic growth projects in the Foster Creek and Christina Lake areas currently under development. New diluent delivery services to the Foster Creek and Christina Lake projects are expected to be operational in mid 2014 and new bitumen blend facilities in support of the Foster Creek project are expected to be in service in early 2015. In the event that the Foster Creek and Christina Lake projects are not both generating revenue by January 1, 2017, the amount of the second instalment will be reduced to \$70 million. As a result, the Fund recognized a \$348.6 million non-cash expense on June 1, 2013.

As a result of the Internalization Transactions, the PAC shareholders agreed to accept consideration in the form of Class A and Class B preferred shares in Inter Pipeline GP Corp., a new corporation established for the purpose of the Internalization Transactions, rather than cash. Initial consideration of \$178.6 million, including adjustments of \$8.6 million, was satisfied with the issuance of 7,411,683 Class A preferred shares in Inter Pipeline GP Corp. on June 1, 2013. On September 1, 2013, the Class A preferred shares were exchanged on a one for one basis for common shares in Inter Pipeline upon successful completion of Corporate Conversion.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)*Notes to Consolidated Financial Statements*

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

Consideration transferred to the PAC shareholders for the second instalment of \$170 million was in the form of 7,055,406 Class B preferred shares in Inter Pipeline GP Corp., which were exchanged on a one for one basis for convertible common shares of Inter Pipeline on September 1, 2013, as a result of Corporate Conversion. These convertible common shares will be converted to common shares in Inter Pipeline on a one for one basis when the Foster Creek and Christina Lake projects are both generating revenue. If this does not occur prior to January 1, 2017, the convertible common shares will be exchanged on a 70/170th basis and the value of the second instalment will be reduced to \$70 million. The convertible common shares are recorded as a liability, as the number of common shares to be issued upon conversion may not be a fixed amount.

The Internalization Transactions were accounted for as transactions between entities under common control. On June 1, 2013, Inter Pipeline GP Corp. and PAC amalgamated as one corporate entity, Inter Pipeline GP Corp. A support agreement entered into by the Fund on June 1, 2013, to unconditionally guarantee the performance of obligations under the preferred share provisions and to provide sufficient funds to Inter Pipeline GP Corp. to declare and pay dividends on and to redeem the preferred shares in certain circumstances, was terminated as a result of completion of Corporate Conversion.

On September 1, 2013, the Fund was dissolved, the General Partner assumed all assets and liabilities of the Fund and then on September 2, 2013, Pipeline Management Inc., Inter Pipeline GP Corp., Inter Pipeline Putco Corp. and Inter Pipeline amalgamated (the Amalgamation) as one corporate entity, and continued carrying on the business of the Fund as Inter Pipeline.

These audited consolidated financial statements of Inter Pipeline follow the continuity of interests at book value basis of accounting for the Amalgamation. As a result, Inter Pipeline's consolidated statements of net (loss) income, comprehensive income and cash flows for the year ended December 31, 2013, are a combination of the Fund's statements of net (loss) income, comprehensive income and cash flows for the period January 1, 2013 to August 31, 2013, plus the statements of net income, comprehensive income and cash flows of the amalgamated entities from September 1, 2013 to December 31, 2013. Inter Pipeline's balance sheet at December 31, 2013, is an amalgamation of the balance sheets of the Fund and the amalgamating entities, after eliminating inter company transactions.

On Amalgamation, the following assets and liabilities of the amalgamated companies were transferred to Inter Pipeline:

Cash	\$	8,955
Working capital		(9,173)
Deficit	\$	(218)

As a result of Corporate Conversion, the LPA was terminated and Inter Pipeline is no longer required to pay management, acquisition, divestiture or incentive fees (note 16). The general and administrative costs previously incurred by the General Partner for all matters relating to the operation of the Fund had historically been recorded in the financial statements of the Fund as operating or general and administrative expenses.

* The majority of property, plant and equipment additions are related to constructed assets and are initially recorded as construction work in progress before being transferred to pipelines, facilities and equipment or pipeline line fill when the related asset is available for use.

At December 31, 2013, Inter Pipeline expects to spend approximately \$1,542.3 million on property, plant and equipment, of which \$1,310.2 million is due within one year and \$232.1 million is due in one to five years. These amounts do not include capital expenditures related to the 15% non-controlling interest in Cold Lake.

The amount of borrowing costs capitalized during the year ended December 31, 2013, was \$26.3 million (December 31, 2012 – \$5.7 million). The weighted average rate used to determine the amount of borrowing costs eligible for capitalization was 3.90% (December 31, 2012 – 4.62%).

The carrying amounts of goodwill allocated to the Corridor and Polaris pipeline systems in the oil sands transportation business are \$52.6 million and \$104.3 million, respectively, in 2013 and 2012. Goodwill was originally assigned to the Corridor and Polaris CGUs, respectively, upon original acquisition. The carrying amounts of goodwill allocated to the Simon Storage and Inter Terminals bulk liquid storage business CGU's are \$60.5 million and \$124.4 million, respectively (December 31, 2012 - \$55.3 million and \$111.9 million, respectively).

Corridor and Polaris Pipeline Systems

In arriving at the fair value less costs of disposal after-tax discount rates of 2.9% and 5.0% were applied to after-tax cash flows from the Corridor and Polaris pipeline systems, respectively. Cash flow projections are based on long-term contractual transportation agreements with shippers. These cash flows are then aggregated with a 'terminal value'. The terminal value represents the value of cash flows beyond the tenth year, incorporating a declining growth rate of 2% for Corridor and no growth rate for Polaris. The key assumption to which the calculation of fair value less costs of disposal for the Corridor and Polaris pipeline systems are most sensitive is the discount rate used to present value cash flow projections.

Simon Storage and Inter Terminals Bulk Liquid Storage Operations

Goodwill relating to the bulk liquid storage business has been assessed, applying an after-tax discount rate of 6.3% and 6.4% to after-tax cash flows of Simon Storage and Inter Terminals, respectively. Valuations are based on cash flow projections that incorporate best estimates of revenue, operating and maintenance expenditures, administrative expenses and capital expenditures over 10 years. These cash flow projections are then aggregated with a 'terminal value', representing the value of cash flows beyond the tenth year incorporating an annual growth rate of 2.5% for Simon Storage and an annual growth rate of 2.2% for Inter Terminals. The calculation of fair value less costs of disposal is most sensitive to assumptions about discount rates and revenue.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

The key assumptions used by Inter Pipeline in calculating fair value less costs of disposal are as follows:

Discount Rates

Discount rates represent the current market assessment of the risks specific to each CGU, taking into consideration the time value of money and individual risks of the underlying assets that have not been incorporated in the cash flow forecasts. The discount rate or weighted average cost of capital (WACC) is based on the specific circumstances of each CGU. The WACC calculation takes into account appropriate debt and equity weightings. The cost of equity is derived from the expected risk-free rate of return plus an appropriate equity risk premium, and the after-tax cost of debt is based on expected borrowing rates for each CGU. Segment-specific risks are also considered and are evaluated annually based on publicly available market data. Management performed a sensitivity analysis by increasing the WACC to 9% for both European CGU's while leaving all other variables constant. As a result, the recoverable amounts of the CGU's are still above the carrying amounts. Management did not perform a sensitivity analysis for the Corridor and Polaris CGU's as the recoverable amounts calculated were significantly higher than the carrying amounts.

Revenues

Revenues in the Corridor and Polaris CGU's are based on long-term contractual transportation agreements with shippers. Revenues in the Simon Storage and Inter Terminals CGU's are based on management's best estimates, taking into consideration existing contracts, timing of contract renewals, as well as relevant market factors such as contango and backwardation in the oil products markets served by Inter Terminals. The market in which Inter Terminals operates continued to be impacted by backwardation in 2013 and sustained periods of backwardation could adversely affect the Inter Terminals CGU. While management's cash flow estimates factored in a period of backwardation, recoverable amounts calculated were still significantly above carrying amounts.

Management believes, at December 31, 2013, that there are no reasonably possible changes in any of the key assumptions that would lead to the recoverable amounts being below the carrying amounts, as a result of completing various sensitivity analyses.

9. DIVIDENDS TO SHAREHOLDERS

	December 31 2013	December 31 2012
Dividends declared to shareholders	\$ 338,184	\$ 285,231
Declared amount (\$ per share)	\$ 1.1775	\$ 1.0550

As at December 31, 2013, dividends of \$33.0 million were payable on 306.8 million outstanding common shares at \$0.1075 per share (December 31, 2012 - \$25.5 million payable on 274.9 million outstanding Class A units and 0.3 million outstanding Class B units at \$0.0925 per unit, January 1, 2012 - \$23.1 million payable on 263.9 million outstanding Class A units and 0.3 million outstanding Class B units at \$0.0875 per unit).

On January 9, 2014, Inter Pipeline declared dividends of \$0.1075 per share. The dividends were paid on February 14, 2014, to all shareholders of record on January 22, 2014. The total declared dividends were approximately \$33.1 million. On February 6, 2014, Inter Pipeline declared dividends of \$0.1075 per share. The dividends will be paid on or about March 14, 2014, to all shareholders of record on February 24, 2014. The total estimated declared dividends are approximately \$33.2 million.

Reinvestment of Dividends

Of the total dividends declared to shareholders, \$246.7 million were settled with the issuance of shares under the Premium DividendTM and Dividend Reinvestment Plan for the year ended December 31, 2013 (2012 - \$209.0 million).

Discount, net of accumulated amortization	(2,234)	(2,103)	(2,007)
Add: Current portion of transaction costs and discounts	3,413	2,818	3,094
Long-term debt	2,345,591	1,760,902	1,102,288
Current portion of long-term debt including transaction costs and discounts (c)	287,983	-	90,989
Commercial paper including transaction costs and discounts* (a)	1,309,452	1,351,132	1,464,369
	\$ 3,943,026	\$ 3,112,034	\$ 2,657,646

* Commercial paper issued by Corridor is fully supported and management expects that it will continue to be supported by the Unsecured Revolving Credit Facility that has no repayment requirements until December 2017.

- (a) On December 12, 2013, Corridor extended the maturity date of the \$1,550 million Unsecured Revolving Credit Facility to December 15, 2017, which can be extended again under certain conditions. No amounts were outstanding on the demand facility at December 31, 2013 (2012 - \$nil), with the exception of letters of credit valued at \$0.2 million (2012 - \$0.2 million).

Fees on amounts borrowed at floating rates based on bankers' acceptances are 100 basis points, while fees on unborrowed amounts are 40 basis points. If Corridor's credit rating changes, the fees on floating rate amounts could increase by up to 75 basis points or reduce by up to 15 basis points, while fees on undrawn amounts could increase by up to 30 basis points and decrease by up to 6 basis points. The effective rate of interest incurred in 2013 was 1.32% (2012 - 1.32%) for the \$1,550 million Unsecured Revolving Credit Facility. Fees on amounts borrowed under the demand facility match the \$1,550 million Unsecured Revolving Credit Facility while undrawn amounts are not charged standby fees.

- (b) On April 19, 2013, Inter Pipeline increased the size of its Unsecured Revolving Credit Facility from \$750 million to \$1,250 million. On September 2, 2013, as a result of Corporate Conversion, Inter Pipeline restated its \$1,250 million Unsecured Revolving Credit Facility on terms similar to the previous facility. On December 5, 2013, Inter Pipeline extended the maturity date of its \$1,250 million Unsecured Revolving Credit Facility to December 5, 2018, which can be extended again under certain conditions.

Fees on amounts borrowed at floating rates based on bankers' acceptances are 120 basis points, while fees on unborrowed amounts are 24 basis points. If Inter Pipeline's credit rating changes, fees on floating rate amounts could increase by up to 105 basis points or be reduced by up to 35 basis points, while fees on undrawn amounts could increase by up to 21 basis points and decrease by up to 7 basis points. The effective combined interest rate for both the \$1,250 million

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

and \$750 million Unsecured Revolving Credit Facilities incurred in 2013 was 2.42% (2012 – 2.47%).

Inter Pipeline increased the size of its demand facility from \$20 million to \$40 million on May 14, 2013. Inter Pipeline replaced this \$40 million demand line with a new \$40 million demand facility on September 2, 2013, as a result of the Corporate Conversion. Fees on amounts borrowed under the facility are based on the prime rate plus 20 basis points, while unborrowed amounts are not charged standby fees. No amounts were drawn on this facility at December 31, 2013.

At December 31, 2013, letters of credit of \$0.5 million were issued by Inter Pipeline under its demand facility.

(c) On October 28, 2004, the Fund borrowed \$379.8 million from the General Partner with the following terms:

- \$91.2 million due October 28, 2012, 5.85%, which was repaid on October 29, 2012; and
- \$288.6 million due October 28, 2014, 6.15%, which is included in the current portion of long-term debt.

On this date, the General Partner had received \$379.8 million by way of a Private Placement note issuance and immediately loaned the funds to the Fund. This loan to the Fund had the identical repayment terms and commitments as the notes payable by the General Partner to the institutional note holders, except for an interest rate increase of 5 basis points over the rates payable on the notes issued by the General Partner. There are no scheduled repayments of the principal amounts of the notes prior to maturity. A prepayment may be made at any time, in which case Inter Pipeline would generally be required to pay a premium of 50 basis points over the implied yield to maturity and, if applicable, swap breakage costs of the counterparty.

As a result of Corporate Conversion (note 5), on September 2, 2013, the remaining outstanding loan balance of \$288.6 million is owed directly by Inter Pipeline to the Private Placement noteholders. The terms of the notes have not changed and Inter Pipeline pays interest directly to the Private Placement noteholders at 6.10%; however Inter Pipeline is no longer required to pay the additional 5 basis points over the rates payable on the notes to the General Partner.

(d) The \$150 million 5.033% Series B debentures due February 2, 2015 and the \$150 million 4.897% Series C debentures due February 3, 2020 (Corridor Debentures) are unsecured obligations subject to the terms and conditions of a trust indenture dated February 1, 2005 and a supplemental indenture dated February 2, 2010. Interest is payable semi-annually in equal installments in arrears on February 2 and August 2 of each year, except for 2020 in which case interest is payable on the \$150 million 4.897% Series C debentures on February 3, 2020 for interest accrued for the period from and including August 2, 2019 to and including February 2, 2020. Corridor uses a derivative instrument to exchange its fixed rate of interest to floating rates of interest on the \$150 million 5.033% Series B debentures (note 20). This results in an average effective interest rate that is different from the stated interest rate on the \$150 million 5.033% Series B debentures of 1.84% (2012 – 1.85%).

The Corridor Debentures are redeemable in whole, or in part, at the option of Corridor at a price equal to the principal amount to be redeemed, plus accrued and unpaid interest including a premium above the implied yield to maturity.

(e) On December 9, 2013, Inter Pipeline filed a short form base shelf prospectus with Canadian regulatory authorities. Under provisions detailed in the short form base shelf prospectus, Inter Pipeline may offer and issue, from time to time: (i) common shares; (ii) preferred shares; (iii) debt securities and (iv) subscription receipts (collectively, the “Securities”) of up to \$3.0 billion

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)*Notes to Consolidated Financial Statements*

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

aggregate initial offering price of Securities during the 25 month period that the short form base shelf prospectus is valid. Securities may be offered separately or together, in amounts, at prices and on terms to be determined based on market conditions at the time of sale and set forth in one or more prospectus supplements. This short form base shelf prospectus replaces the previous one filed by the Fund on November 30, 2012.

The Senior Unsecured Medium-Term Notes are comprised of the following:

- i) On February 2, 2011, Inter Pipeline issued \$325 million of 4.967% Unsecured Medium-Term Notes, Series 1 (MTN Series 1) due February 2, 2021, in the Canadian public debt market. The MTN Series 1 were issued under Inter Pipeline's short form base shelf prospectus dated November 30, 2010, a related prospectus supplement dated January 19, 2011, and a related pricing supplement dated January 28, 2011. The MTN Series 1 bear interest at the rate of 4.967% per annum, payable semi-annually. Proceeds from the offering were used to pay down a portion of the amount drawn under Inter Pipeline's \$1,250 million Unsecured Revolving Credit Facility.
- ii) On July 29, 2011, Inter Pipeline issued \$200 million of 3.839% Unsecured Medium-Term Notes, Series 2 (MTN Series 2) due July 30, 2018, in the Canadian public debt market. The MTN Series 2 were issued under the same short form base shelf prospectus and related prospectus supplement as the MTN Series 1 and a related pricing supplement dated July 26, 2011. The MTN Series 2 bear interest at a rate of 3.839% per annum, payable semi-annually in equal instalments in arrears on July 30 and January 30 of each year, except for the first interest payment on January 30, 2012, which was calculated from and including July 29, 2011, to and excluding January 30, 2012. Proceeds from the offering were used to repay a portion of the amount drawn under Inter Pipeline's \$1,250 million Unsecured Revolving Credit Facility.
- iii) On May 28, 2012, Inter Pipeline issued \$400 million of 3.776% Senior Unsecured Medium-Term Notes, Series 3 (MTN Series 3) due May 30, 2022, in the Canadian public debt market. The MTN Series 3 were issued under the same short form base shelf prospectus and related prospectus supplement as the MTN Series 1 and the MTN Series 2 and a related pricing supplement dated May 23, 2012. The MTN Series 3 bear interest at the rate of 3.776% per annum, payable semi-annually in equal instalments in arrears on May 30 and November 30 of each year, except for the first interest payment on November 30, 2012, which was calculated from and including May 28, 2012, and excluding November 30, 2012. Proceeds from the offering were used to pay down a portion of the amount drawn under Inter Pipeline's \$1,250 million Unsecured Revolving Credit Facility.
- iv) On July 19, 2013, Inter Pipeline issued \$500 million of 3.448% Senior Unsecured Medium-Term Notes, Series 4 (MTN Series 4) due July 20, 2020, in the Canadian public debt market. The MTN Series 4 were issued under Inter Pipeline's short form base shelf prospectus dated November 30, 2012, a related prospectus supplement and a related pricing supplement both dated July 16, 2013. The MTN Series 4 bear interest at the rate of 3.448% per annum, payable semi-annually in equal instalments in arrears on January 20 and July 20 of each year, except for the first interest payment on January 20, 2014, which was calculated from and including July 19, 2013, and excluding January 20, 2014. Proceeds from the offering were used to pay down a portion of the amount drawn under Inter Pipeline's \$1,250 million Unsecured Revolving Credit Facility.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

11. PROVISIONS

The following table shows the movement in the long-term liability for provisions:

	Decommissioning Obligations	Environmental Liabilities	Total
Balance, January 1, 2012 <i>(restated)</i>	\$ 20,281	\$ 16,744	\$ 37,025
Revisions to estimated amount of liabilities <i>(restated)</i>	1,614	811	2,425
Acquisition of Inter Terminals (note 26)	18,360	-	18,360
Obligations discharged	-	(20)	(20)
Accretion expense <i>(restated)</i>	1,319	502	1,821
Foreign currency adjustments	340	2	342
Balance, December 31, 2012 <i>(restated)</i>	41,914	18,039	59,953
Revisions to estimated amount of liabilities	70	(357)	(287)
Obligations discharged	-	(22)	(22)
Accretion expense	1,469	435	1,904
Foreign currency adjustments	3,020	534	3,554
Balance, December 31, 2013	\$ 46,473	\$ 18,629	\$ 65,102

The following estimates of expected economic life and inflation rates were used to calculate the undiscounted amount of estimated expenditures expected to be incurred on decommissioning of active pipeline systems, NGL extraction facilities and leased bulk liquid storage sites and remediation of known environmental liabilities. The long-term risk-free rates were used to discount the future cash flows for decommissioning obligations and the 5 to 10 year risk-free rates were used to discount the future cash flows for environmental liabilities:

	Expected Economic Life (years)*	Inflation Rate	Long-Term Risk-Free Discount Rate	5 to 10 Year Risk-Free Discount Rate
Oil sands transportation business	80 to 500 **	2.0%	3.7%	n/a
NGL extraction business	40	2.0%	3.7%	n/a
Conventional oil pipelines business	40 to 500**	2.0%	3.7%	2.05% to 3.25%
Bulk liquid storage business	40	1.7% to 2.4%	3.2% to 4.15%	1.45% to 2.9%

* Environmental liabilities are being accreted over 5 to 10 years.

** The expected economic life of the oil sands and Bow River pipeline systems is 80 to 500 years. The mid-point value of 290 years is used in the decommissioning obligation assessment.

At December 31, 2013, \$41.2 million is included in accounts payable and accrued liabilities for provisions (December 31, 2012 - \$2.0 million).

12. EMPLOYEE BENEFITS

	December 31 2013	December 31 2012	January 1 2012
Pension liability	\$ 6,254	\$ 2,396	\$ 758
Long-term incentive plan liability	5,632	7,235	6,231
Employee benefits	\$ 11,886	\$ 9,631	\$ 6,989

a) Long-Term Incentive Plan

As a result of Corporate Conversion (note 5), Inter Pipeline's Restricted Share Unit Plan (RSUP) was amended to replace references to the Fund and Class A units to Inter Pipeline and common shares, respectively.

Effective January 1, 2006, Inter Pipeline implemented an LTIP for its employees, officers, and directors. The LTIP is governed by a RSUP document that defines how awards made under the RSUP will be

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

determined and administered. A Restricted Share Unit (RSU), as granted under the RSUP, is valued based on Inter Pipeline's share price plus credit for cash dividends paid to shareholders during the period the RSUs are held. Unless otherwise provided in an individual grant agreement, the RSU will vest one-third on each of the successive anniversary dates from the date of grant. The life of RSUs granted is three years. Upon exercise of a RSU, the amount owing will be paid out in cash net of applicable withholding taxes.

At December 31, 2013, the current portion of the liability included in accounts payable and accrued liabilities was \$18.5 million (December 31, 2012 - \$16.2 million, January 1, 2012 - \$12.7 million). At December 31, 2013, 651,647 RSUs are exercisable. Inter Pipeline's closing share price at December 31, 2013, was \$25.83.

The total intrinsic value of RSUs vested and not exercised as at December 31, 2013, was \$17.6 million (December 31, 2012 - \$15.5 million, January 1, 2012 - \$13.2 million).

The weighted average remaining contractual life of the outstanding RSUs as at December 31, 2013 was 1.5 years (December 31, 2012 - 1.5 years, January 1, 2012 - 1.5 years).

For the year ended December 31, 2013, operating expenses included \$4.4 million and general and administrative expenses included \$19.4 million related to RSUs (2012 - \$5.5 million and \$18.3 million, respectively).

The following table summarizes the status of Inter Pipeline's RSUs as at December 31, 2013, and December 31, 2012:

	Number of RSUs
Balance, January 1, 2012	1,370,679
Granted	682,476
Exercised	(723,922)
Forfeitures	(34,748)
Balance, December 31, 2012	1,294,485
Granted	663,635
Exercised	(794,226)
Forfeitures	(31,651)
Balance, December 31, 2013	1,132,243

b) Pension Liability

Inter Pipeline acquired Simon Storage on October 4, 2005 and Simon Tanklager-Gesellschaft MBH on January 1, 2006. At the time of acquisitions, the fair values of the pension plan liabilities were recognized on Inter Pipeline's consolidated balance sheet and there were no unrecognized gains or losses.

UK

Inter Pipeline operates a defined benefit funded pension plan, the Simon Storage Pension Fund (Pension Fund), providing benefits for its employees based primarily on years of service and final pensionable salary. The Pension Fund is administered by a corporate trustee and its assets are independent of Inter Pipeline's finances. The most recent actuarial valuation of the Pension Fund was carried out as at April 6, 2013. Professionally qualified actuaries performed the actuarial valuation and then adjusted and updated the results to the reporting date, with the obligation measured using the projected unit method. The Pension Fund was closed to new entrants from September 30, 2010. At the same time, a change was made to the Pension Fund's rules, which restricts the level of future increases in pensionable salaries to the lower of price inflation and 5.0% each year. This change came into effect on April 6, 2011. The next valuation date for funding purposes is April 6, 2016.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

Ireland

Inter Pipeline operates a defined benefit funded pension plan, the Irish Bulk Liquid Storage Limited Retirement and Death Benefits Scheme (Scheme) which provides benefits for its employees based on years of service and final pensionable salary. The Scheme is administered by a corporate trustee and its assets are independent of Inter Pipeline's finances. The most recent actuarial valuation of the Scheme was carried out as at December 31, 2013. Professionally qualified actuaries performed the actuarial valuation and then adjusted and updated the results to the reporting date, with the obligation measured using the projected unit method. With effect from September 1, 2010, the Scheme was closed to future benefit accrual. The next valuation date for funding purposes is December 31, 2016.

Germany

The German benefit plans included in Inter Pipeline's financial reporting relate to defined benefit retirement pensions, long-service awards and partial early retirement arrangements. The German arrangements are unfunded and therefore have no assets. The most recent actuarial valuation of the long-term employee and post-retirement benefits under local tax and accounting rules was carried out as at December 31, 2013, by professionally qualified actuaries. For Inter Pipeline's financial reporting purposes the defined benefit obligations are calculated on a triennial basis by independent actuaries using the projected unit credit method, with approximate updates in interim years.

The pension plans' assets are not Inter Pipeline's assets and therefore are not included in the consolidated balance sheets. Assets are shown at market value using the bid price. The actual distribution of the respective pension plan assets as of December 31 is as follows:

Pension Plan Assets by Asset Category	UK			Ireland		
	2013	2012	2011	2013	2012	2011
Equity securities	47%	47%	45%	-	-	-
Debt securities	41%	40%	41%	-	-	-
Real estate	12%	13%	14%	-	-	-
Deferred annuity contract	-	-	-	100%	100%	100%
Total	100%	100%	100%	100%	100%	100%

The significant actuarial assumptions adopted in measuring Inter Pipeline's accrued benefit obligations are as follows:

Weighted Average Assumptions for Expense	UK		Ireland		Germany	
	2013	2012	2013	2012	2013	2012
Discount rate	4.6%	4.4%	4.0%	3.6%	3.6%	3.2%
Rate of price inflation	3.5%	3.1%	2.0%	2.0%	2.0%	2.0%
Compensation increase	3.4%	3.0%	n/a	n/a	n/a	n/a
Rate of pension payment increase	3.4%	3.0%	2.8%	2.8%	1.5%	1.5%

13. INCOME TAXES

All dividends declared and paid by Inter Pipeline following Corporate Conversion on September 1, 2013, are designated as "eligible dividends" for Canadian income tax purposes.

In the bulk liquid storage business, the 2013 results reflect recent tax legislative changes in Denmark and the UK.

In Denmark, tax legislation was substantively enacted on June 27, 2013, which will reduce the statutory income tax rate from 25% to 24.5% for 2014, from 24.5% to 23.5% for 2015 and from 23.5% to 22% for 2016 onward. The effect of recognizing these Danish income tax rate changes was a \$1.3 million reduction in deferred income tax liabilities.

In the UK, tax legislation was substantively enacted on July 2, 2013, which reduces the statutory income tax rate from 23% to 21%, effective April 1, 2014, and from 21% to 20%, effective April 1, 2015 (2012 - 25% to 24%, effective April 1, 2012, and from 24% to 23%, effective April 1, 2013). The effect of recognizing these UK income tax rate changes was a \$5.0 million (2012 - \$3.5 million) reduction in deferred income tax liabilities.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)*Notes to Consolidated Financial Statements*

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

The major components of income tax expense for the years ended December 31, 2013 and 2012 are as follows:

	December 31 2013	December 31 2012 <i>(restated)</i>
Current income taxes		
Current income tax charge	\$ 56,983	\$ 57,920
Adjustments in respect of current income tax of the previous year	131	(878)
Current income tax	57,114	57,042
Deferred income taxes		
Relating to the origination and reversal of temporary differences	36,513	35,184
Adjustments in respect of deferred income tax of the previous year	(700)	571
Adjustments to deferred tax attributable to changes in tax rates and laws	(6,330)	(3,502)
Deferred income tax	29,483	32,253
Provision for income taxes	\$ 86,597	\$ 89,295

Deferred income taxes recognized directly in shareholders' equity are as follows:

	December 31 2013	December 31 2012
Deferred income tax recovery on defined pension benefit reserve	\$ 314	\$ 215
Deferred income tax recovery on share issue costs	3,532	-
Income tax credited to Shareholders' Equity	\$ 3,846	\$ 215

The provision for income taxes is summarized by jurisdiction as follows:

	December 31 2013	December 31 2012 <i>(restated)</i>
Current income taxes		
Canada	\$ 56,328	\$ 56,275
Europe	786	767
	57,114	57,042
Deferred income taxes		
Canada	37,086	36,032
Europe	(7,603)	(3,779)
	29,483	32,253
	\$ 86,597	\$ 89,295

The components of income before income taxes are summarized below:

	December 31 2013	December 31 2012 <i>(restated)</i>
Canada	\$ 7,232	\$ 366,529
Europe	32,370	39,748
	\$ 39,602	\$ 406,277

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

Income tax expense varies from amounts computed by applying the Canadian federal and provincial statutory income tax rates to income before income taxes as shown in the following table:

	December 31 2013	December 31 2012 <i>(restated)</i>
Income before income taxes per consolidated financial statements	\$ 39,602	\$ 406,277
Income before income taxes attributable to non-controlling interest	(11,135)	(9,869)
Adjusted income before income taxes	28,467	396,408
Tax rate	25.0%	25.0%
	7,117	99,102
General Partner internalization	87,369	-
Deductible intercompany interest expense	(3,698)	(6,466)
Impact of rate reductions	(6,330)	(3,502)
Other	2,139	161
Provision for income taxes	\$ 86,597	\$ 89,295

The tax rates used in the reconciliation above are the combined federal and provincial tax rates payable by Inter Pipeline in Canada.

Deferred income taxes relate to the following temporary differences:

	Consolidated Balance Sheets			Consolidated Statements of Net (loss) Income	
	December 31 2013	December 31 2012	January 1 2012	December 31 2013	December 31 2012
Property, plant and equipment	\$ (439,875)	\$ (398,576)	\$ (337,166)	\$ (38,836)	\$ (32,521)
Non-capital losses	95,541	88,563	79,136	7,182	8,912
Goodwill and intangible assets	(86,299)	(85,941)	(101,474)	(2,059)	1,315
Employee benefits	1,081	366	(23)	(91)	(112)
Working capital	317	444	698	453	367
Provisions	13,500	12,594	7,228	1,598	895
Derivative financial instruments	289	(1,981)	9,127	2,270	(11,109)
Deferred income tax expense				\$ (29,483)	(32,253)
Net deferred tax liability	\$ (415,446)	\$ (384,531)	\$ (342,474)		

Reconciliation of net deferred income tax liabilities:

	2013	2012
Balance, January 1	\$ (384,531)	\$ (342,474)
Tax expense recognized in net income	(29,483)	(32,253)
Tax recovery recognized in equity	3,532	-
Tax recovery recognized in OCI	314	215
Acquisition of Inter Terminals (note 26)	-	(9,043)
Revaluation of foreign deferred income tax liabilities and other	(5,278)	(976)
Balance, December 31	\$ (415,446)	\$ (384,531)

Deferred income tax assets and liabilities are recognized for temporary differences between the carrying amount of the consolidated balance sheet items and their corresponding tax values as well as for the benefit of losses available to be carried forward to future tax years that are likely to be realized. The amount of unrecognized losses at December 31, 2013 are \$5.5 million (December 31, 2012 and January 1, 2012 - \$2.1 million).

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

Calculation of Net (Loss) Income per Common Share

Basic earnings per share is calculated by dividing the net (loss) income for the year attributable to common shareholders of Inter Pipeline by the weighted average number of common shares outstanding during the year. The number of diluted shares outstanding is calculated using the Treasury Stock method based on the weighted average number of shares outstanding for the year as follows:

	December 31 2013	December 31 2012
Net (loss) income attributable to shareholders – basic and diluted	\$ (58,095)	\$ 307,153
Weighted average shares outstanding – basic	285,942,828	269,897,073
Effect of Premium Dividend™ and Dividend Reinvestment Plan*	-	696,346
Weighted average shares outstanding – diluted	285,942,828	270,593,419
Net (loss) income per common share attributable to shareholders – basic and diluted	\$ (0.20)	\$ 1.14

* The effect of 689,706 shares issued under the Premium Dividend™ and Dividend Reinvestment Plan and 2,338,915 convertible common shares was not included in the calculation of diluted net loss per common share attributable to shareholders for the year ended December 31, 2013, as they are anti dilutive.

Reserves

Reserves are summarized as follows:

	Foreign Currency Translation Reserve	Defined Benefit Pension Reserve	Total Reserves
Balance, January 1, 2012	\$ (23,923)	\$ (8,357)	\$ (32,280)
Other comprehensive income (loss)	10,486	(1,710)	8,776
Balance, December 31, 2012	\$ (13,437)	\$ (10,067)	\$ (23,504)
Balance, January 1, 2013	\$ (13,437)	\$ (10,067)	\$ (23,504)
Other comprehensive income (loss)	80,978	(3,178)	77,800
Balance, December 31, 2013	\$ 67,541	\$ (13,245)	\$ 54,296

15. NON-CONTROLLING INTEREST

Summarized information on the balance sheets and results of operations relating to the 15% non-controlling interest in Cold Lake which has its principal place of business in Calgary, Alberta, are:

	December 31 2013	December 31 2012 <i>(restated)</i>	January 1 2012 <i>(restated)</i>
Current assets	\$ 21,703	\$ 2,498	\$ 1,443
Non-current assets	273,229	89,699	84,675
Current liabilities	(10,884)	1,172	(35)
Non-current liabilities	(31)	(12)	(7)
Proportionate share of net assets	\$ 284,017	\$ 93,357	\$ 86,076

	December 31 2013	December 31 2012 <i>(restated)</i>
Revenues	\$ 21,024	\$ 18,968
Expenses	9,889	9,099
Current income tax	35	40
Proportionate share of net income and comprehensive income	\$ 11,100	\$ 9,829

At December 31, 2013, purchase obligations related to Cold Lake totalled \$69.3 million. In addition, there were \$693.3 million of commitments to purchase property, plant and equipment related to Inter Pipeline's 85% interest in the Cold Lake entity. These commitments and purchase obligations are included in total commitments and contingencies disclosed in notes 7 and 17.

16. RELATED PARTY TRANSACTIONS

Inter Pipeline wholly owns a number of subsidiaries located in Canada and Europe and an 85% interest in two subsidiaries located in Canada (2012 – 100% interests in Canada and Europe and an 85% interest in two subsidiaries located in Canada).

No revenue was earned from related parties for the years ended December 31, 2013 and 2012.

Following Corporate Conversion on September 1, 2013, Inter Pipeline is no longer required to pay management, acquisition, divestiture and incentive fees (note 5). Management fees of \$8.0 million were earned by the General Partner in the year ended December 31, 2013 (2012 - \$12.0 million). As a result of Corporate Conversion, no incentive fees were earned by the General Partner for the year ended December 31, 2013, as the annual distributable cash threshold of the LPA was not met prior to Corporate Conversion when the LPA was terminated (incentive fees earned in 2012 - \$1.8 million). No acquisition fees or disposition fees were earned by the General Partner in the year ended December 31, 2013 (2012 – \$4.6 million and \$nil, respectively).

In the year ended December 31, 2013, certain of the officers and directors of the General Partner received \$1.4 million in dividends from PAC pursuant to their non-voting shares (2012 - \$2.0 million).

On June 1, 2013, Inter Pipeline recognized a non-cash General Partner internalization expense of \$348.6 million related to the indirect purchase of its General Partner (note 5). In addition, certain key management personnel contracts were renegotiated, resulting in recognition of an additional short-term employee benefits expense of \$2.5 million in the year ended December 31, 2013. An additional share based payment expense was recognized related to RSUs of \$2.5 million in the year ended December 31, 2013.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

In 2004, Inter Pipeline entered into a loan agreement with the General Partner for \$379.8 million of which \$288.6 million was outstanding prior to Corporate Conversion. As a result of the Amalgamation transactions on September 2, 2013, this remaining loan balance of \$288.6 million is payable directly by Inter Pipeline to the Private Placement noteholders and is no longer a related party transaction (note 10).

Key Management Personnel

Total compensation of the Board of Directors and top three officers consisted of the following for the years ended:

	December 31 2013	December 31 2012
Short-term employee benefits*	\$ 9,023	\$ 4,971
Share-based payments**	10,688	9,882
Total compensation***	\$ 19,711	\$ 14,853

* Short-term employee benefits consist of base salary, annual earned bonuses and employer contributions for non-monetary benefits.

** Share-based payments consist of the compensation expense recognized for RSUs outstanding at the year end and RSUs exercised by key management personnel during the year (see note 12a for a discussion of the RSUP).

*** Post employment benefits, other long-term benefits and termination benefits are not applicable for Inter Pipeline's key management personnel in the years ended December 31, 2013 and 2012.

17. COMMITMENTS AND CONTINGENCIES

On June 15, 2007, Inter Pipeline entered into an agreement with the Corridor shippers to guarantee the payment and performance of all obligations, other than repayment of borrowed amounts or similar financial obligations, of Corridor or the operator (if the operator is not Inter Pipeline) in favour of the shippers under the FSA and other related agreements. The guarantee may be exercised in the event that Corridor, Inter Pipeline, or the operator (if the operator is not Inter Pipeline) fails to pay or perform such obligations for any reason.

Inter Pipeline has committed to purchase obligations totaling approximately \$169.2 million at December 31, 2013 (refer to note 7 for expected property, plant and equipment expenditures). Inter Pipeline is also committed to investing capital in the bulk liquid storage business to comply with the UK's post Buncefield regulations. Potential solutions are being evaluated and expenditures are estimated to be in the range of \$5.0 million to \$7.0 million over the next seven years.

Minimum Lease Payments

Inter Pipeline has entered into lease agreements for office space, storage, property, plant and equipment and land for periods ranging from 2014 to 2090. Certain leases contain extension and renewal options. The future minimum annual lease payments for these lease commitments are:

Less than one year	\$ 9,583
One to five years	54,995
After five years	177,445
	\$ 242,023

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

18. CAPITAL DISCLOSURES

Financial objectives are aligned with Inter Pipeline's commercial strategies and its long-term outlook for the business. Inter Pipeline's capital management objectives are to maintain (i) stable cash dividends to shareholders over economic and industry cycles; (ii) a flexible capital structure which optimizes the cost of capital within an acceptable level of risk; and (iii) an investment grade credit rating. Management manages the capital structure and makes adjustments based on changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or modify the capital structure, Inter Pipeline may adjust the level of cash dividends paid to shareholders, issue new common shares or new debt, renegotiate new debt terms or repay existing debt.

Inter Pipeline maintains flexibility in its capital structure to fund growth capital and acquisition programs throughout market and industry cycles. Inter Pipeline projects its funding requirements to ensure appropriate sources of financing are available to meet future financial obligations and capital programs. Inter Pipeline generally relies on committed credit facilities and funds from operations to finance ongoing capital requirements. At December 31, 2013, Inter Pipeline had access to committed credit facilities totaling \$2,800.0 million, of which \$852.8 million remained unutilized. Inter Pipeline also had access to unutilized demand facilities of \$65.0 million, of which \$64.3 million remained unutilized. Certain unutilized amounts under these facilities are available to specific subsidiaries of Inter Pipeline.

Taking future market trends into consideration, Inter Pipeline regularly forecasts its operational requirements and expected funds from operations to ensure that sufficient funding is available for future sustaining capital programs and dividends to shareholders.

Capital under management includes long-term debt, short-term debt and commercial paper (excluding discounts and transaction costs) and shareholders' equity. Capital is monitored through a number of measures, including total recourse debt to capitalization^{*} and recourse debt to adjusted EBITDA^{**}. Capital management objectives are to provide access to capital at a reasonable cost while maintaining an investment grade long-term corporate credit rating and ensuring compliance with all debt covenants.

Management's long-term objectives are to remain well below its maximum permitted ratio of 65% recourse debt to capitalization^{*} and maximum senior recourse debt to adjusted EBITDA^{**} ratio of 4.25 times. In March 2013, terms under an amended note purchase agreement became effective, which enabled the permitted recourse debt to adjusted EBITDA^{**} ratio to increase from 4.25 to 5.5 times. The higher ratio provides Inter Pipeline with greater financial flexibility to fund its oil sands transportation expansion projects. Once the debt issued under the note purchase agreement matures in October 2014, the recourse debt to adjusted EBITDA^{**} covenant will no longer exist. The recourse debt to capitalization^{*} and senior recourse debt to adjusted EBITDA^{**} measures below are similar to the coverage ratio terms contained in Inter Pipeline's credit agreements. Adjusted EBITDA^{**} calculated below includes the 15% non-controlling interest in Cold Lake and all net income associated with non-recourse subsidiaries, while the credit agreements only include distributed earnings attributable to shareholders of Inter Pipeline.

^{*} Recourse debt to capitalization is an additional GAAP measure and is calculated by dividing the sum of debt facilities outstanding with recourse to Inter Pipeline (excluding discounts and debt transaction costs) by total capitalization excluding outstanding debt facilities with no recourse to Inter Pipeline.

^{**} Adjusted EBITDA is an additional GAAP measure whose nearest GAAP measure is net income. Additional GAAP measures do not have a standardized meaning prescribed by GAAP and therefore may not be comparable to similar measures presented by other entities.

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

19. FINANCIAL INSTRUMENTS**a) Classification of Financial Assets and Financial Liabilities**

The carrying value of Inter Pipeline's financial assets and liabilities recorded at December 31, 2013, are classified as follows:

	Fair Value Through Profit or Loss	Cash, Loans and Receivables	Other Financial Liabilities	Carrying Value of Financial Asset or Liability	Non- Financial Asset or Liability*	Carrying Value of Asset or Liability
Assets**						
Cash and cash equivalents	\$ -	\$ 47,236	\$ -	\$ 47,236	\$ -	\$ 47,236
Accounts receivable	-	209,956	-	209,956	36,354	246,310
Prepaid expenses and other deposits	-	27,645	-	27,645	13,657	41,302
Derivative financial instruments***	5,446	-	-	5,446	-	5,446
Liabilities						
Dividends payable	-	-	32,980	32,980	-	32,980
Accounts payable and accrued liabilities	4,811	-	522,096	526,907	51,841	578,748
Derivative financial instruments***	1,394	-	-	1,394	-	1,394
Deferred revenue and other liabilities	-	-	673	673	22,551	23,224
Long-term debt, short-term debt and commercial paper (note 10)****	-	-	3,960,848	3,960,848	-	3,960,848
Long-term payable	395	-	-	395	-	395
Convertible common shares (note 5)	-	-	170,000	170,000	-	170,000

* Not all components of assets and liabilities meet the definition of a financial asset or liability.

** Inter Pipeline does not have any assets that meet the definition of "available-for-sale" or "held-to-maturity."

*** FVTPL are recorded at fair value using a discounted cash flow methodology.

**** Carrying values include commercial paper and exclude discounts and transaction costs with the respective accumulated amortization.

b) Fair Value of Financial Instruments

The fair values of long-term debt, convertible common shares and derivative financial instruments are discussed in the following paragraphs. The long-term portion of unrealized gains arising from the interest rate swap contract payable to the Corridor shippers is designated as FVTPL and is carried at fair value.

At December 31, 2013, the carrying values of fixed rate debt and convertible common shares compared to fair values are as follows:

	Carrying Value*	Fair Value
Loan payable to Private Placement noteholders	\$ 288,648	\$ 298,597
Corridor Debentures	\$ 300,000	\$ 318,672
Senior Unsecured Medium-Term Notes	\$ 1,425,000	\$ 1,449,804
Convertible common shares	\$ 170,000	\$ 177,655

* Carrying value excludes transaction costs, discount and accumulated amortization.

The estimated fair value of the fixed rate debt has been determined based on available market information and appropriate valuation methods, including the use of discounted future cash flows using current rates for similar financial instruments subject to similar risks and maturities. The actual amounts realized may differ from these estimates.

The estimated fair value of the convertible common shares is calculated as the 20 day volume adjusted weighted average price of Inter Pipeline's shares.

The fair values of derivative financial instruments are calculated by Inter Pipeline using a discounted cash flow methodology with reference to actively quoted forward prices and/or published price quotations in an observable market and market valuations provided by counterparties. Forward prices for NGL swaps are less transparent because they are less actively traded. These forward prices are assessed based on available market information for the time frame for which there are derivative instruments in place. These

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)*Notes to Consolidated Financial Statements*

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

fair values are discounted using a risk-free rate plus a credit premium that takes into account the credit quality of the instrument.

The fair values of derivatives and other financial instruments used for risk management activities are recorded in the consolidated balance sheets as follows:

	December 31 2013	December 31 2012	January 1 2012
Current asset	\$ 5,051	\$ 20,816	\$ 5,167
Non-current asset	395	4,865	9,772
Current liability	(1,394)	(8,336)	(25,746)
Non-current liability	-	-	(11,035)
	\$ 4,052	\$ 17,345	\$ (21,842)

Derivative financial instruments carried at fair value are as follows:

	December 31 2013	December 31 2012	January 1 2012
Frac-spread risk management			
NGL swaps	\$ (1,287)	\$ 16,246	\$ (13,691)
Natural gas swaps	147	(6,776)	(15,573)
Foreign exchange swaps	(107)	(1,535)	(7,189)
	(1,247)	7,935	(36,453)
Interest rate risk management			
Interest rate swaps	5,206	9,435	14,611
	5,206	9,435	14,611
Power price risk management			
Electricity price swap	93	(25)	-
	93	(25)	-
	\$ 4,052	\$ 17,345	\$ (21,842)

Net Gains or Losses**Realized and Unrealized Gain (Loss) on Derivative Instruments – Fair Value Through Profit or Loss**

Realized gains (losses) represent actual settlements under derivative contracts during the year. The realized gains (losses) on derivative financial instruments recognized in net (loss) income were:

	December 31 2013	December 31 2012
Revenues		
NGL swaps	\$ 17,133	\$ 12,444
Foreign exchange swaps (frac-spread)	(4,585)	146
	12,548	12,590
Shrinkage gas expense		
Natural gas swaps	(7,600)	(14,894)
	(7,600)	(14,894)
Operating expenses		
Electricity price swaps	363	-
	363	-
Financing charges

Realized and Unrealized Gain (Loss) on Other Classes of Financial Instruments

Inter Pipeline had no significant gains (losses) or impairment losses on other classes of financial instruments.

20. RISK MANAGEMENT

Inter Pipeline is exposed to a number of inherent financial risks arising in the normal course of operations which include market price risk related to commodity prices, foreign currency exchange rates and interest rates, credit risk and liquidity risk.

a) Market Risk

Market risk is the risk or uncertainty that the fair value of financial instruments, future cash flows and net earnings of Inter Pipeline will fluctuate due to movements in market rates. Inter Pipeline utilizes derivative financial instruments to manage its exposure to market risks relating to commodity prices, foreign exchange and interest rates. Inter Pipeline has a risk management policy in place that defines and specifies the controls and responsibilities associated with those activities managing market exposure to changing commodity prices (crude oil, natural gas, NGLs and power) as well as changes within financial markets relating to interest rates and foreign exchange exposure for Inter Pipeline. Inter Pipeline's risk management policy prohibits the use of derivative financial instruments for speculative purposes.

In the following sections, sensitivity analyses are presented to provide an indication of the amount that an isolated change in one variable may have on net income and are based on derivative financial instruments and long-term debt, short-term debt and commercial paper outstanding at December 31, 2013. The analyses are hypothetical and should not be considered to be predictive of future performance. Changes in fair value generally cannot be extrapolated based on one variable because the relationship with other variables may not be linear. In reality, changes in one variable may magnify or counteract the impact of another variable which may result in a significantly different conclusion.

Frac-spread Risk Management

Inter Pipeline is exposed to frac-spread risk which is the relative price differential between the sale of NGL produced and the purchase of shrinkage gas used to replace the heat content removed during the extraction of the NGL from the natural gas stream. Derivative financial instruments are utilized to manage frac-spread risk. Inter Pipeline transacts with third party counterparties to sell a notional portion of its NGL products and purchase related notional quantities of natural gas at fixed prices. NGL price swap agreements are transacted in US currency therefore Inter Pipeline also enters into foreign exchange contracts to sell US dollars to convert notional US dollar amounts in the NGL swaps to Canadian dollars.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

Contracts outstanding at December 31, 2013, represented approximately 3% of forecast propane-plus volumes at the Cochrane extraction facility for the period January 1, 2013 to December 31, 2014, at an average frac-spread price of approximately \$0.79 CAD/US gallon. This average price approximated \$0.74 USD/US gallon based on the average USD/CAD forward curve as at December 31, 2013.

The following table illustrates how a 10% change in NGL and AECO natural gas commodity prices and foreign exchange rates in isolation could individually impact the mark-to-market valuation of Inter Pipeline's derivative financial instruments used to manage frac-spread risk and consequently after-tax income assuming rates associated with each of the other components and all other variables remain constant:

	Fair Value of Derivative Financial Instruments	Change in Net Income Based on 10% Increase in Prices/Rates**	Change in Net Income Based on 10% Decrease in Prices/Rates**
NGL*	\$ (1,287)	\$ (541)	\$ 541
AECO natural gas	147	133	(133)
Foreign exchange	(107)	(445)	445
Frac-spread risk management	\$ (1,247)		

* Assumes that a commodity price change will impact all propane, normal butane, isobutane and pentanes-plus products linearly.

** Negative amounts represent a liability increase or asset decrease.

Interest Rate Risk Management

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of a change in market interest rates. Inter Pipeline manages its interest rate risk by balancing its exposure to fixed and variable rates while minimizing interest costs. When deemed appropriate, Inter Pipeline enters into interest rate swap agreements to manage its interest rate price risk exposure.

At December 31, 2013, Inter Pipeline has a fixed-to-floating interest rate swap on the \$150 million 5.033% Series B Corridor debentures.

Inter Pipeline's exposure to interest rate risk primarily relates to its long-term debt obligations and fair valuation of floating-to-fixed interest rate swap agreements. Since fixed rate long-term debt is carried at amortized cost rather than at fair value, the carrying value of this debt is not subject to interest rate risk. Since the fair value gains and losses on the fixed-to-floating interest rate swap agreements are offset by the long-term payable or long-term receivable, there is no interest rate risk on these agreements.

Based on the variable rate debt obligations outstanding at December 31, 2013, a 1% change in interest rates at this date would have changed interest expense on credit facilities for the year ended December 31, 2013, by approximately \$19.5 million assuming all other variables remain constant. Of this amount, \$13.1 million for the year ended December 31, 2013, relates to the \$1,550 million Unsecured Revolving Credit Facility (note 10) and is recoverable through the terms of Corridor's FSA, therefore the after-tax income impact for the year ended December 31, 2013, would be \$4.8 million.

Power Price Risk Management

Inter Pipeline may enter into electricity price swap contracts to manage power price risk exposure in the conventional oil pipelines business. During the year ended December 31, 2013, Inter Pipeline entered into an electricity price swap agreement in the conventional oil pipelines business. Inter Pipeline may also enter into financial heat rate swap contracts to manage power price risk exposure in the NGL extraction business. As at December 31, 2013, there are no heat rate price swap agreements outstanding.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

At December 31, 2013, a 10% change in Alberta power pool commodity prices in isolation with all other variables held constant would have changed the mark-to-market valuation of Inter Pipeline's derivative financial instruments used to manage power price risk, and consequently after-tax income, by approximately \$0.1 million.

Foreign Exchange Risk Management

Inter Pipeline is exposed to currency risk resulting from the translation of assets and liabilities of its European bulk liquid storage operations and transactional currency exposures arising from purchases in currencies other than Inter Pipeline's functional currency, the Canadian dollar. Transactional foreign currency risk exposures have not been significant historically, therefore are generally not hedged; however, Inter Pipeline may decide to hedge this risk in the future.

b) Credit Risk

Credit exposure on financial instruments arises from a counterparty's inability or unwillingness to fulfill its obligations to Inter Pipeline. Inter Pipeline's credit risk exposure relates primarily to customers (accounts receivable) and financial counterparties holding cash and derivative financial instruments. Inter Pipeline's exposure to credit risk arises from default of a customer or counterparty's obligations, with a maximum exposure equal to the carrying amount of these instruments. Credit risk is managed through credit approval and monitoring procedures.

With respect to credit risk arising from cash, deposits and derivative financial instruments, Inter Pipeline believes the risks of non-performance of counterparties are minimal as cash, deposits and derivative financial instruments outstanding are predominantly held with major financial institutions or investment grade corporations.

At December 31, 2013, Inter Pipeline considers that the risk of non-performance of its customers is minimal based on Inter Pipeline's credit approval, ongoing monitoring procedures and historical experience. The creditworthiness assessment takes into account available qualitative and quantitative information about the counterparty including, but not limited to, financial status and external credit ratings. Depending on the outcome of each assessment, guarantees or some other form of credit enhancement may be requested as security. Inter Pipeline attempts to mitigate its exposure by entering into contracts with customers that may permit netting or entitle Inter Pipeline to lien or take product in kind and/or allow for termination of the contract on the occurrence of certain events of default. Each business segment monitors outstanding accounts receivable on an ongoing basis.

At December 31, 2013, accounts receivable outstanding meeting the definition of past due and impaired are insignificant.

Concentrations of credit risk associated with accounts receivable relate to a limited number of principal customers in the oil sands transportation and NGL extraction business segments, the majority of which are affiliated with investment grade corporations in the energy and chemical industry sectors. At December 31, 2013, accounts receivable associated with these two business segments were \$175.6 million or 71.3% of total accounts receivable outstanding. Inter Pipeline believes the credit risk associated with the remainder of accounts receivable is minimized due to diversity across business segments and customers.

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)*Notes to Consolidated Financial Statements*

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

c) Liquidity Risk

Liquidity risk is the risk that suitable sources are not available to fund business operations, commercial strategies or meet financial obligations (refer to note 18 for capital disclosures and note 17 for commitments and contingencies). The table below summarizes the contractual maturity profile of Inter Pipeline's financial liabilities at December 31, 2013, on an undiscounted basis:

	Total	Less Than One Year	One to Five Years	After Five Years
Dividends payable	\$ 32,980	\$ 32,980	\$ -	\$ -
Accounts payable and accrued liabilities	578,748	578,748	-	-
Deferred revenue and other liabilities	23,224	6,763	10,163	6,298

Long-term debt, short term debt and commercial paper**	3,960,848	1,600,848	985,000	1,375,000
Convertible common shares***	170,000	-	170,000	-
Long-term payable*	432	-	432	-
	\$ 4,767,630	\$ 2,220,737	\$ 1,165,595	\$ 1,381,298

* Derivative financial instruments are shown on a net basis. Derivative financial instruments and the long-term payable represent an estimate of the fair value liability on an undiscounted basis for financially net settled derivative contracts outstanding at December 31, 2013, based upon contractual maturity dates. Fair values of derivative financial instruments and the long-term payable reported on the consolidated balance sheets are shown on a discounted basis.

** Commercial paper issued by Corridor is fully supported and management expects that it will continue to be supported by the Unsecured Revolving Credit Facility that has no repayment requirements until December 2017.

*** Convertible common shares are expected to be converted to equity and will not be settled in cash (note 5).

21. FINANCING CHARGES

Summarized information on the results of operations and financial position relating to Inter Pipeline's 50% interest in the Empress V extraction facility are:

	December 31 2013	December 31 2012
Revenues	\$ 110,644	\$ 85,145
Expenses	(100,094)	(74,540)
Proportionate share of net income and comprehensive income	\$ 10,550	\$ 10,605

	December 31 2013	December 31 2012
Current assets	\$ 14,108	\$ 21,258
Non-current assets	96,241	100,422
Current liabilities	(10,266)	(17,038)
Non-current liabilities	(802)	(726)
Proportionate share of net assets	\$ 99,281	\$ 103,916

The principal place of business of this joint operation is Calgary, Alberta. At December 31, 2013, there were no commitments to purchase property, plant and equipment and no purchase obligations related to Inter Pipeline's interest in the jointly controlled Empress V extraction facility.

26. ACQUISITION OF INTER TERMINALS

On January 11, 2012, Inter Pipeline completed the acquisition, and thereby obtained control, of Inter Terminals from a subsidiary of DONG Energy A/S, through the purchase of 100% of its share capital. The acquisition was valued at \$459.1 million plus closing adjustments and the assumption of surplus cash, for a total cash consideration of \$509.7 million and was funded from Inter Pipeline's credit facility. The acquisition more than doubled Inter Pipeline's total bulk liquid storage capacity in Western Europe, adding scale and diversification to European storage operations.

Operating results for Inter Terminals were included in the consolidated financial statements from January 11, 2012. If the acquisition had taken place on January 1, 2012, as opposed to January 11, 2012, the impact on revenue and net income would have been immaterial.

As a result of this transaction, an acquisition fee of \$4.6 million was paid to the General Partner, pursuant to the terms of the LPA. Acquisition related costs \$0.2 million were expensed and included in general and administrative expenses in the consolidated statements of net income.

The acquisition was accounted for using the acquisition method at the closing date of January 11, 2012. Finalization of the acquisition accounting in the year ended December 31, 2012, had no impact on the financial statements for the year ended December 31, 2013. The allocation of the consideration transferred was as follows:

Cash	\$ 48,293
Non-cash working capital (note 23)	15,513
Property, plant and equipment (note 7)	342,159
Goodwill (note 8)	110,870
Intangible assets (note 8)	20,281
Decommissioning obligation (note 11)	(18,360)
Deferred income tax liability (note 13)	(9,043)
	\$ 509,713

Inter Pipeline Ltd. (Formerly Inter Pipeline Fund)

Notes to Consolidated Financial Statements

December 31, 2013

(tabular amounts in thousands of Canadian dollars, except as otherwise indicated)

Goodwill of \$110.9 million relates to the fair value of strategic synergies, expansion options at the existing terminals, value of the assembled workforce, renewal of customer contracts, and other intangible assets, which do not require separate recognition. Tax deductible goodwill of \$196.1 million arising on this acquisition was different than goodwill recognized for accounting purposes as a result of specific Danish tax laws.

27. TRANSITION TO IFRS 10

Inter Pipeline has assessed its consolidation conclusions at January 1, 2013, in accordance with IFRS 10 becoming effective, and concluded that it has controlled Cold Lake since the acquisition of its additional 70% ownership interest on January 2, 2003, and that 100% of Cold Lake should be consolidated. The 15% ownership interest in Cold Lake that is not attributable to Inter Pipeline is presented in the consolidated financial statements as activities and balances attributable to a non-controlling interest. Inter Pipeline's 85% ownership interest in Cold Lake was previously accounted for as a joint venture and was consolidated in a manner that reflected Inter Pipeline's 85% ownership interest in the individual income, expenses, assets, liabilities and cash flows of Cold Lake on a line by line basis in its consolidated results.

Inter Pipeline has accounted for this change in accounting policy using the relevant transitional provisions of IFRS 10 by accounting for its acquisition of Cold Lake using IFRS 3 *Business Combinations*, as at the acquisition date of January 2, 2003, and consolidating Cold Lake since the acquisition date. The adjustments for each financial statement line item affected are presented in the following tables:
