(1) Not all components of assets and liabilities meet the definition of a financial asset or liability.

(2) Inter Pipeline does not have any assets that meet the definition of "fair value through profit or loss", "available-for-sale" or "held-to-maturity."

(3) Carrying values include commercial paper and exclude discounts and transaction costs with the respective accumulated amortization.

b) Fair Value of Fixed Rate Debt

At March 31, 2016, the carrying values of fixed rate debt compared to fair values are as follows:

	Carrying Value[1]	Fair Value
Corridor debentures	$ 150.0	$ 164.2

(1) Carrying value excludes transaction costs, discount and accumulated amortization.

13. RISK MANAGEMENT

Inter Pipeline is exposed to a number of inherent financial risks arising in the normal course of operations which include market risk related to interest rates, commodity prices and foreign currency exchange rates, credit risk and liquidity risk.

a) Market Risk

Based on the variable rate debt obligations outstanding at March 31, 2016, a 1% change in interest rates at this date would have changed interest expense for the three months ended March 31, 2016, by approximately $6.2 million assuming all other variables remain constant. Of this amount, $3.4 million for the period ended March 31, 2016, relates to the Corridor syndicated credit facility (note 5) and is recoverable through the terms of the Corridor firm service agreement; therefore, the after-tax income impact for the three months ended March 31, 2016, would be $2.0 million. When deemed appropriate, Inter Pipeline may enter into interest rate or cross-currency swap agreements to manage its interest rate price risk exposure. As at March 31, 2016, there were no interest rate hedges outstanding.

Inter Pipeline may enter into electricity price swap agreements and heat rate price swap agreements to manage power price risk in the conventional oil pipelines business and NGL extraction business, respectively. Inter Pipeline may also enter into natural gas liquids, AECO natural gas, and foreign exchange swap contracts to manage frac-spread risk exposure in the NGL extraction business. As at March 31, 2016, there were no electricity price swap agreements, heat rate price swap agreements, or frac-spread positions outstanding.

Transactional foreign currency risk exposures have not been significant historically, therefore are generally not hedged; however, Inter Pipeline may decide to hedge this risk in the future. As at March 31, 2016, there are no foreign exchange hedges outstanding.

b) Credit Risk

Credit risk exposure relates primarily to the non-performance of Inter Pipeline's customers and financial counterparties. Inter Pipeline believes that the credit risk arising from cash, cash equivalents and deposits outstanding is minimal as these financial assets are predominantly held with major financial institutions or investment grade corporations.

At March 31, 2016, Inter Pipeline considers that the risk of non-performance of its customers is minimal based on Inter Pipeline's credit approval, ongoing monitoring procedures and historical experience.

Accounts receivable are deemed past due if they are aged greater than 60 days and are considered to be impaired if one or more events have occurred that would impact the estimated future cash flows of that asset. At March 31, 2016, accounts receivable outstanding meeting the definition of either past due or impaired are insignificant.

Concentrations of credit risk associated with accounts receivable relate to a limited number of principal customers in the oil sands transportation and NGL extraction business segments, the majority of which are affiliated with investment grade corporations in the energy and chemical industry sectors. At March 31, 2016, accounts receivable associated with these two business segments were $93.3 million or 63.8% of total accounts receivable outstanding. Inter Pipeline believes the credit risk associated with the remainder of accounts receivable is minimized due to diversity across business segments and customers.

c) Liquidity Risk

The table below summarizes the contractual maturity profile of Inter Pipeline's financial liabilities at March 31, 2016, on an undiscounted basis:

	Total	Less Than One Year	One to Five Years	After Five Years
Dividends payable	$ 43.8	$ 43.8	$ -	$ -
Accounts payable, accrued liabilities and provisions	178.0	178.0	-	-

Total	$ 5,096.8	$ 1,619.2	$ 2,273.7	$ 1,203.9

(1) Commercial paper issued by Corridor is fully supported and management expects that it will continue to be supported by the Corridor syndicated credit facility that has no repayment requirements until December 2019.
