

## ENVIRONMENTAL POLICY

### POLICY

Inter Pipeline will operate its business in a manner that protects the environment, promotes environmental stewardship, and supports long-term sustainability. We recognize that a strong environmental performance is essential to the success of our overall business, and we commit to continual improvement of our operations.

### COMMITMENTS

Inter Pipeline will:

- Strive to minimize the environmental impact of our operations and improve our efficient use of resources over time
- Integrate and communicate on environmental, social, and governance priorities in all aspects of our business to ensure safe, ethical, inclusive, transparent, socially, and environmentally responsible operations
- Support the goal of net zero greenhouse gas emissions by 2050, including through the development and implementation of robust decarbonization plans
- Establish and implement policy, standards, programs, and procedures to ensure work practices comply with all applicable environmental legislation and sustainability commitments
- Incorporate energy efficiency and carbon reduction measures to prevent and minimize the environmental impacts of our operations
- Set and review environmental objectives, and continually monitor and assess environmental performance as part of assurance and improvement programs
- Implement effective and timely response measures to manage environmental incidents and reduce potential impacts to the environment, human health and safety, or property
- Develop a culture that encourages respect for the environment, emphasizes everyone's responsibility in environmental performance, and fosters appropriate operating practices through employee awareness, training, and stakeholder engagement
- Communicate regularly about, and make this policy available to, all workers, communities, governments, and stakeholders
